REPORT ON PUBLIC INSTRUCTION IN BOMBAY, 1917-18.

CHAPTER I.

GENERAL PROGRESS.

General.—In paragraphs 5 and 6 of his preface to Volume V—Education of "Statistics of British India" the Director of Statistics showed that the educational expenditure as well as the number of pupils under instruction had decreased in this Presidency since the pre-war year 1913-14. The pupils were shown to have declined from 1,029 to 780 thousand and the expenditure from 160 to 156 lakhs and it was remarked that the expenditure in this Presidency had "not increased with the rapidity that had been effected in most provinces". It must be explained, however, that the comparison of figures on which the above conclusion is based is vitiated by the circumstance overlooked by the Director of Statistics that while the statistics recorded in the Annual Report for 1913-14 included figures of institutions situated in Native States, those returned in the reports for succeeding years excluded them altogether under the orders of the Government of India. While the figures shown for 1916-17 are for British Districts only, those for 1913-14 which have been adopted as the basis of comparison are for both British and Native State territories. If statistics for British and Native State territories combined are taken for both the years for the purposes of comparison, the decrease recorded turns into an increase from 1,029 to 1,042 thousand in the case of pupils and from 160 to 180 lakhs in the case of expenditure.

2. The remark in paragraph 10 that "in Bombay both institutions and scholars decreased by 135 and 17,623 respectively" will appear to be equally misleading if regard is had to the fact noted in paragraph 237 of my Quinquennial Report that the figures for 1916-17 were considerably vitiated by the omission from the statistical tables of 40,686 pupils attending 780 schools which were closed on March 31st, 1917, on account of plague in the Central Division alone. If the latter figures are taken into account the decrease noted by the Director of Statistics is easily converted into a large increase.

3. **Progress during the year.**—The total number of institutions, public and private, rose during the year 1917-18 from 13,264 to 13,543 and the number of pupils from 780,504 to 781,674. There is now on an average 1 institution for every 4,450 of the population and 4 out of every 100 of the population are under instruction in it. The percentage of male pupils to male population is 3·2 and that of female pupils to female population 1·6.

4. The total expenditure on education also increased from Rs. 1,55,88,759 to Rs. 1,64,30,488, giving an average incidence of 13 annas 4 pies per head of the population. Of this expenditure, Rs. 79,18,912, against Rs. 75,50,817 reported last year, was met from provincial funds. The increase in the provincial contribution was due to the removal of the restrictions on educational expenditure enforced during the early period of the war and to the renewal of the usual provincial grant of Rs. 2 lakhs for the opening of new primary schools, the giving of code pay to primary school teachers and the employment of additional staff in undermanned schools, and also to the receipt of the Government of India grant of Rs. 2½ lakhs for the pay and training of teachers.

5. **The War.**—War propaganda was prosecuted with unabated zeal in schools and colleges on the lines indicated in paragraph 30 of my Quinquennial Report. A "War Loan Day" was organised on the 14th June, 1917, to popularise the War Loan movement, with the result that subscriptions to the Loan from schools and colleges in the Presidency amounted to Rs. 7,97,873-9-0. An "Our Day" celebration was organised on the 12th December in aid of the Red Cross fund for the comforts of sick and wounded soldiers in India and in Mesopotamia. As collections made in aid of this fund were made payable to the different local committees of the fund direct, full figures of the total amount collected by schools and colleges are not available. The collections in

the Northern Division are reported to have amounted to Rs. 12,703-9-8 and in Sind to Rs. 3,769-3-2. The European and English-teaching schools contributed Rs. 19,498-1-0. The collections remitted through this office amounted to Rs. 1,950-10-6.

6. **Imperial Grants.**—To the large Government of India grants for the improvement and extension of education received since 1911-12 was added during the year a further recurring allotment of Rs 2,50,000 given expressly for the improvement of the pay and training of teachers in primary and secondary schools. This additional assignment was utilised in raising the minimum pay of untrained primary school assistants from Rs. 9 to Rs. 10 and of untrained primary school head masters from Rs. 11 to Rs. 12; in giving the full face value of their training certificates to trained primary school teachers not yet in receipt of it; in increasing the number and value (uniformly to Rs. 10 per mensem) of stipends to students under training in the Government primary training colleges; and in improving the pay of language teachers in Government secondary schools and primary training colleges. The actual expenditure incurred from this grant during the year amounted to Rs. 1,86,384.

7. In paragraph 35 of my Quinquennial Report for 1912-13 to 1916-17 the balance remaining unspent at the end of March, 1917, was shown as Rs. 39,95,403. Including this balance the Imperial grants account for the year 1917-18 stood as follows:—

	Rs.
Balance on 1st April 1917	39,95,403
Total recurring Imperial grants received in 1917-18	9,73,715
Total	49,69,118
<i>Deduct—</i>	
Total of recurring and non-recurring amounts actually spent from Imperial grants in 1917-18	9,75,837
Balance on 31st March 1918	39,93,281

The greater part of the balance shown above has, however, been already pledged, the total pledged during the year 1917-18 being Rs. 2,55,000 recurring and Rs. 12,331 non-recurring. The total remaining unpledged at the end of March, 1918, was Rs. 33,690 recurring and Rs. 6,84,325 non-recurring (including savings from the recurring grants available for non-recurring expenditure).

CHAPTER II.

ADMINISTRATION.

8. At the beginning of the year I took over charge as Director from Mr. A. L. Covernton who had been officiating in the post since December, 1916. About the middle of the year Mr. P. C. Wren, who had proceeded home on leave on medical certificate, retired on invalid pension as his illness (brought on by military service in East Africa) was declared to be such as to render him unfit for further service in India. He was an officer of remarkable literary facility and of many ideas on educational topics. A prolific writer on school subjects, he produced a number of books and manuals which have been widely adopted. He served the Department in diverse capacities—as Head Master of the Karachi High School and Principal of the Elphinstone High School, as Principal of the Secondary Training College, and as Assistant Director of Public Instruction. His premature retirement made it difficult to fill the void caused at the Secondary Training College, Bombay, by the sudden death about the close of the year of Mr. J. N. Fraser who was carried off by small-pox after a very short illness. The post of Principal, Sir J. J. School of Art, Bombay, was also vacated at the close of the year by Mr. C. L. Burns who retired from service on March 31st. Two officers, in addition to those named in the last year's report, viz., Messrs. Turnbull and Sisson, Professors of English at the Deccan and Elphinstone Colleges, were transferred during the year to the Military Department. Thus, the Indian Educational Service was very seriously depleted, while its recruitment in England has stopped altogether owing to the war.

9. The Provincial Educational Service, on the other hand, gained an accession of strength by the creation of posts of Inspectress of Kanarese Girls' Schools in the Southern Division and of Lecturers in English and Logic, Sanskrit, Mathematics, and Physics for the new Arts College at Dharwar.

10. During the year under report, the recommendations of the Indian Public Services Commission regarding the Educational Services came under the detailed consideration of Government in this Presidency. A local Committee of officials and non-officials was appointed in November, 1917, to examine the recommendations; its report was submitted to Government in December. Final orders of Government on the subject are now anxiously awaited. Recommendations were also made for filling six permanent vacancies in the Indian Educational Service by Indians who were deemed fit for appointment to the Indian Educational Service.

CHAPTER III. THE UNIVERSITY.

11. Among the most important events in the history of the University for the year was the final approval, by both Government and the University, of a scheme creating a Joint Board for the conduct of a School-leaving Examination, which will be accepted in place of the present Matriculation and School Final Examinations, on the one hand, by the University as qualifying for admission to the colleges and, on the other, by Government as qualifying for Government service. Under the regulations of the Joint School-leaving Examination, candidates for admission to the University will have to pass at one and the same examination in English, an additional language (e.g., Sanskrit, Persian, Latin, Greek, French, Hebrew, etc.), Arithmetic, Algebra and Geometry, and History (English as well as Indian) and to produce a certificate from the headmaster of the school presenting them that they have gone through a satisfactory course of instruction in Geography, Vernacular (or optional English) and Elementary Science. Candidates for Government service will have to produce a certificate from their headmaster as regards the study of Geography only, and, besides passing the School-leaving Examination in English, Arithmetic and History, will have to pass, at the same examination or within two years, in a Vernacular and any two of the following subjects, viz., Algebra and Geometry, Elementary Science, Book-keeping and Commercial Correspondence, Shorthand and Type-writing, and (in the case of girls) Domestic Science. The first Joint School-leaving Examination will be held in March, 1919. The Board consists of 10 members, of whom 5 have been nominated by the University and 3 by Government and 2 have been co-opted from amongst the headmasters of recognized schools. It is hoped that the creation of this Board has disposed of the long-pending controversy between Government and the University in regard to the Matriculation examination and has ushered in an era of co-operation between the University and the Educational Department for the improvement of secondary education in the Presidency. Another matter involving far-reaching consequences was a proposal for the introduction of a larger elective element (as much as 70 per cent) in the Senate of the University and its reconstitution on this basis. The proposal was approved by the Senate and submitted to Government. Other events of importance were the opening of a new Government College at Dharwar and the completion of a scheme for a new college under private management at Surat. Perhaps of more general interest from an Imperial standpoint than any of the events just mentioned, was the formation, in September, 1917, of a Bombay University Company of the Indian Defence Force. To this University unit all the Bombay and Poona colleges contributed, the total strength being 257 and the highest number contributed by any college (either actually or in proportion to its enrolment) being 75 from the Wilson College. The Fergusson College provided 66 men and 3 professors, and the Deccan and Elphinstone Colleges 20 men each (the Deccan 1 professor also). The New Poona College produced 5 men. Of the professional colleges, the College of Commerce found 10 men and the Law School 16, the Engineering College 5, the Medical 27 and the Agricultural 2. The Company was placed for training under Captain Steele of the 13th Hussars, with, as lieutenants under him, Messrs. Turnbull and Sisson, Professors of English at the Deccan and Elphinstone Colleges respectively; the training was conducted at Poona. This year it is proposed to form two University companies and it is hoped that students will enlist in still larger numbers.

12. Among legislative enactments of the University during the year may be mentioned *inter alia* (i) the revision of the regulations for the M.A. examination with a view to admitting under certain conditions graduates of other Indian Universities to the examination and (ii) the adoption of a scheme of equivalence between certain examinations of the Bombay University and corresponding examinations of other Indian Universities with the object of enabling under-graduates of the other universities to enter colleges of this Presidency. The Committee of the Syndicate composed of the principals of the three Arts Colleges in Bombay City, which was appointed to consider the question of organizing a system of inter-collegiate work for post-graduate

teaching, submitted their report during the year; and a system of inter-collegiate lectures has, as recommended by them, been established, whereby each of the three Bombay Colleges will give lectures to students of all affiliated colleges in certain parts of each of the subjects for the M.A. examination. To supplement these 'inter-collegiate' lectures, the Syndicate contemplate the organization of other 'University' lectures in those subjects or parts of subjects for which provision cannot be made under the inter-collegiate scheme. In January, 1918, the University invited Sir Jagdish Chandra Bose, who was then on a short visit to Bombay, to deliver a lecture on the results of his researches, and he delivered one on "Plant Autographs and their Revelations." The lecture was largely attended and highly appreciated.

13. The number of arts and professional colleges affiliated to the University (including those in Native States) increased during the year from 17 to 18 owing to the opening of the Karnatak College, Dharwar, in June, 1917; but the number of students attending them decreased from 8,061 to 7,948 owing to the serious disturbance caused by plague to the Gujarat College. The number of those who appeared and passed at the different stages of University studies in 1917-18 were:—64 and 29 at the Master's Stage, 2,348 and 1,255 at the Bachelor's Stage, and 2,309 and 1,188 at the Intermediate Stage. The total numbers who appeared and passed in the different University examinations were thus 4,731 and 2,472. Reports of the examiners show that among the candidates for the lower examinations English is deplorably weak (many cannot even spell correctly) and that the level reached in subjects requiring historical and geographical knowledge is very low. Of the successful candidates, 2,075 were Hindus, 226 Parsis, 73 Mahomedans, 69 Indians Christians, 41 Europeans and Anglo-Indians, and 18 of other races and religions. At the Matriculation 5,610 appeared and 2,934 passed, i.e., 52.3 per cent. The numbers of those who took the Bachelor's Degree in different subjects were: in Arts 796, in Science 50, in Law 200, in Medicine 103,* in Engineering 37, in Commerce 52, and in Agriculture 18.

14. The total expenditure of the University, as shown in table IV, amounted to Rs. 3,12,857 against Rs. 2,32,466 in 1916-17. It was largely met from fees which amounted to Rs. 2,14,431.

* Including licentiates.

CHAPTER IV.

ARTS COLLEGES.

15. **Number of Colleges.**—The number of arts colleges (excluding those situated in Native States) increased from 8 to 9 owing to the opening of the Karnatak College, Dharwar, by Government in June, 1917. The scheme for a second-grade college at Surat materialized during the year and the college was opened soon after its close, i.e., in June, 1918. At the same time the New Poona College, which started as a second-grade college in June, 1916, was raised to the first-grade status.

16. **Number of Students.**—The number of students slightly decreased from 1,888 to 4,758, owing chiefly to the serious disturbance caused by plague to the Gujarat College in which the numbers dropped by about 200. The number of lady students, however, who belong largely to Bombay, remained unaffected and was about the same as last year, viz., 128. Of the total number, 38 were Europeans, 127 Indian Christians, 138 Mahomedans, 485 Parsis, 187 Jains, 75 Lingayats and the rest Brahmins, other Hindus, etc. The largest numbers attended the Wilson and Fergusson Colleges, each of which had over a thousand students.

17. **Examination Results.**—If we take the number of candidates (excluding ex-students) sent up for the Honours B.A. and the percentage of those who secured a first or second class, the colleges stand in the following order:—St. Xavier's 62, Elphinstone 57, Fergusson 48, Wilson 44, Gujarat 43, Sind 36 and Deccan 36. In the first class, Fergusson had 4, St. Xavier's 3 and Elphinstone and Wilson 2 each. At the B.Sc. examination, Elphinstone had 3 first class, St. Xavier's 2 and Sind 1; and at the M.A., Elphinstone alone had a first class. Of the lady students, 1 Indian Christian passed at the M.A. and 1 at the B.Sc., 2 Europeans and 2 Indian Christians at the B.A. Honours, and 4 Hindus and 1 Parsi at the B.A. (Pass Class).

18. **Expenditure.**—The total expenditure on the arts colleges amounted to Rs. 7,70,485 against Rs. 7,75,716 in 1916-17. The decrease was not, however, due to any diminution in the Government contribution, which, on the contrary, increased from Rs. 2,93,828 to Rs. 3,09,052.

The expenditure on scholarships rose from Rs. 50,672 to Rs. 54,719. The Maratha scholar at the Elphinstone College appeared and passed at the B.A. examination this year. There were 2 Maratha scholars at the Deccan College, one in the First year and the other in the Intermediate Class.

19. **Teaching Arrangements.**—The teaching arrangements in the Elphinstone and Deccan Colleges were considerably disturbed during the year by the transfer of Messrs. Turnbull and Sisson to military duty with the University Corps of the Indian Defence Force from November, 1917. Their work was provided for by redistribution among the other members of the teaching staffs.

20. **Tutorial work** was continued in the Elphinstone College with some modifications to suit circumstances. In this college almost every teacher has his private room, and all are in the habit of sitting in these rooms daily and interviewing students who often take to them their difficulties and seek their advice. In the Karnatak College tutorial work in addition to lectures was undertaken in all subjects; and in the St. Xavier's it is reported to have made much progress. In the Sind College the system already exists to a certain extent; and in the Wilson and New Poona Colleges some tentative efforts were made in respect of it. In the Gujarat College, tutorial work was attempted only in the Honours classes, in which special essays were set in all languages, and in History and read over with their writers. In Mr. Robertson's opinion university tutorial work can be appropriate only in the case of such classes: elsewhere it would be strictly school work which ought to have been done in secondary schools. As regards the adoption of the system in the Deccan College, Mr. Bain remarks that in one sense, such a system has always existed there: in another, it is neither possible, nor even desirable, to bring it in. He

does not know on what grounds it is supposed that the tutorial system is a good thing in Oxford and Cambridge. His own opinion is exactly the reverse : "until this war abruptly cut asunder university life in England, the universities were rapidly degenerating, under the operation of this belauded tutorial system, into cram-shops : the object apparently being to drive inferior men through their schools, each college competing with another to produce the largest list of successful examinees and the tutor sinking to the level of a bus-horse by the loss of his leisure. . . . The tutorial system cannot possibly be worked out here, except by the elimination of lectures, or the multiplication, and amelioration, of the staff."

21. **Discipline.**—Discipline in the colleges was generally good.

22. **Provincial Advisory Committees for Indian Students in England.**—

The number of inquiries received by the Committee increased from 294 to 370, the majority of which related to engineering, medical and technical courses and to studies for the I. C. S. examination, the Bar and the Cambridge and Oxford degrees. At the Cambridge Local Examinations held at the Elphinstone High School for candidates from non-European schools 55 appeared and 3 passed in 1917-18 against 68 and 5 respectively in 1916-17. In July, 1917, a conference of the Secretaries of all the Provincial Advisory Committees in India was held at Simla to consider important questions relating to procedure, scope of functions, etc., of the Committees; the decisions there arrived at are under consideration.

CHAPTER V.

SECONDARY EDUCATION.

23. Schools and Pupils.—The number of secondary schools for boys rose during the year from 388 to 420 and the number of pupils from 61,884 to 65,045; the increase in schools being 8 per cent and the pupils 5 per cent. Among the new schools opened, the proportion of High schools to Middle schools was 1 : 7. The increase in pupils was, on the other hand, shared nearly equally by both High and Middle schools. This increase was contributed to by all communities except the Parsis whose number declined from 5,162 to 5,106. The number of Mahomedans increased from 4,890 to 5,072, i.e., 3·7 per cent. The pupils in Government High schools increased from 7,101 to 7,248.

24. Expenditure.—The expenditure (direct) kept pace with the increase in pupils and rose from Rs. 29,41,117 to Rs. 30,87,857, i.e., by 5 per cent, as did the pupils. About 52 per cent of this expenditure was met from fees, 27 per cent from public funds and 21 per cent from other private sources. Of the 27 per cent met from public funds, 14·8 per cent represented the proportion met from Government grants to aided institutions. These figures exclude expenditure on scholarships which also increased from Rs. 77,971 to Rs. 80,411.

25. Staff.—The number of teachers in secondary schools increased from 4,066 to 4,253. This increase was, however, evenly distributed, and both the average number of teachers per school (9) and the average number of pupils per teacher (17) remained unaffected. Of the total number of teachers, one-fourth were trained and a little over one-fourth possessed a University degree. The proportion of trained teachers, as also of those possessing a University degree, is indeed very small but it is steadily increasing. The proposal for the establishment of a separate training college for under-graduate teachers belonging to aided and recognized schools will not, it is feared, materialize before the financial situation created by the war improves. The sudden death of Mr. Fraser has acted as a great set-back to the progress of the arrangements contemplated. The proposal for the creation of a Government provident fund for the benefit of teachers in aided and recognized schools has also been hanging fire. It is hoped, however, that orders of the Government of India will soon enable the matter to be taken in hand at an early date. It was, however, possible during the year to improve the pay and prospects of drill and gymnastic teachers and language teachers employed in Government secondary schools and primary training colleges by the institution of time-scales of pay for them. Proposals for this purpose were framed long ago but had to be held up owing to the retrenchment in expenditure necessitated by the present war.

26. School Life.—Among the general conditions of school life, an important change was effected during the year. The terms in Government schools were readjusted, the 1st of March being fixed as the most convenient date on which to begin the work of the new school year. This change has necessitated a change also in the time of the Government 'High' and 'Middle' School Scholarship examinations. They will henceforward be held in January instead of in April. It has also been arranged to complete the annual examination of pupils of Vernacular standard IV well in advance so that those who desire to proceed to an English school may be enabled to do so early in March without any unnecessary loss of time.

27. Discipline.—The discipline in schools is reported to have been satisfactory on the whole; but the habit of making unauthorized corrections in leaving certificates to secure some unmerited advantage is reported to be on the increase in the Central Division. "Idleness and skimping of work are," Mr. Marrs thinks, "more common than is generally admitted, and teachers who can exact work from an unwilling boy are not as frequently seen as one could wish. The daily investigation of the manner in which boys do their home work might easily be stricter and more effective, and many teachers do

not fully realize their responsibilities in this respect. There are indications of considerable interest in the home rule movement." The headmaster of the Garud High School, Dhulia, by his compulsory games and insistence on a respectful demeanour on the part of his boys is reported to have done much for the discipline of his school. The discipline in the Karachi High School where Mr. Grieve's 'house' system has been introduced and in the Belgaum and Karwar High Schools where Mr. Miller's 'scout' system has been worked is also reported to be particularly good. The scouts at Belgaum took a prominent part in the War Loan Day and Our Day celebrations and in a Fancy Fair and Fête held at Belgaum in October last in aid of the Imperial Relief Fund and the Soldiers' Institute. The scouts at Karwar also did creditable work on the War Loan Day and Our Day and again helped in extinguishing a fire in a building close to the school at great personal risk. The maintenance of good discipline is also helped in some measure by the direct moral instruction imparted in all schools; but, as remarked last year, the general tendency is to rely more on the personal example of the teacher, the general management of the school, and the provision of organized games to which attention is being paid in an ever-increasing measure.

28. Hostels.—The hostel system exercises a wholesome influence on the character of the boys. Caste prejudices disappear, a healthy spirit of comradeship is fostered, and boys of different castes and creeds learn to live together on good terms. All the Government high school hostels in the Southern Division are popular except that at Karwar which is placed at a disadvantage in this respect owing to its situation in an unsuitable and unhealthy locality. In the Northern Division, advantage is not taken of the hostel accommodation provided by Government as freely as might be. The reason is reported to be the apathy of the guardians of the pupils; the reluctance may perhaps be more correctly attributed to the economical habits of the people who find hostel life distinctly dearer than living at home or in private boarding houses. In Sind, the hostels at both Hyderabad and Shikarpur are full to overflowing. The total number of students for whom accommodation is provided in all the Government high school hostels taken together is 940, of whom 684 avail themselves of it, i.e., 72·8 per cent.

29. Courses.—The present courses for the Matriculation and School Final Examinations will in future be superseded by new courses to be framed by the Joint Board for the proposed School-Leaving Examination. The work and teaching in standard VII of Anglo-Vernacular schools will thus be directed by the new courses and will in their turn give a corresponding direction to the work in the lower Anglo-Vernacular standards.

30. Medium of Instruction.—The option given in the School Final Examination of answering questions in history, geography, and the classical language in the vernacular has been withdrawn by the Joint Board. Hence, in the Joint School-Leaving Examination questions in all subjects will have to be answered in English. This regulation constitutes a set-back to those who have been urging the adoption of the vernacular not only as the medium of instruction in schools but also as the medium of expression in examinations in all subjects except English.

31. Science Teaching.—For the guidance of aided and recognized schools Mr. Pratt recommends the preparation of a monograph, jointly by the Educational and Public Works Departments, enumerating and explaining in detail the essential features of a good school laboratory and giving several alternative designs for buildings and furniture. The special work done during the year in connection with science teaching was the organization of hygiene teaching in Anglo-Vernacular schools. This work involved the preparation of notes for the benefit of teachers on the object and importance of hygiene teaching, on methods of instruction and on details of lessons covering the whole course including all the experimental work. Mr. Pratt notes the tendency among headmasters to cut down the time assigned to science work below the minimum of 120 minutes laid down and attributes it to the treatment of science as a 'certificate' subject and to its exclusion from the schedule of actual 'examination' subjects under both the Matriculation and the new School-Leaving certificate tests. He is decidedly of opinion (and there is very much

to be said for his point of view) that if science-teaching is to command the respect which its importance demands and if the ends at which it aims are to be achieved, it should be included among the examination subjects. Another view of the present course is that in it the theoretical side and book work are not sufficiently co-ordinated with the practical work and that in some schools too much stress is laid on the experimental aspect of the course to the prejudice of a clear and precise comprehension of the underlying principles and the general objects that govern the experiments.

32. First Aid.—This subject is regularly taught in standard VII with the help, wherever available, of medical men approved by the St. John Ambulance Association and many teachers and boys now possess certificates of proficiency in the subject. The number of passes from the Government High schools in the year ending 30th September, 1917, was 270 in First Aid, 29 in Home Nursing and 20 in Home Hygiene.

33. Drawing.—The Drawing Examinations were held at 104 centres. The report of the Inspector of Drawing contains no remarks of any general value. It is therefore difficult to appraise the worth of the work done under the new regulations and of the effectiveness of the new examinations.

34. Manual Training.—Sloyd teaching continues in the Dharwar, Belgaum and Bijapur High Schools in the Southern Division and in the Satara, Sholapur and Dhulia High Schools in the Central Division on the lines indicated in the last year's report. It must be noted, however, that the suspension of the Sloyd Training Class at Dharwar in 1916 on account of the retrenchment in expenditure caused by the present war has prevented the extension of the scheme to High schools in the Northern Division and in Sind. The work done at some schools (e.g., at the Government High schools at Dharwar and Belgaum) certainly seems creditable and should be valuable as an antidote to excess of literary study. The extent, however, to which such training will react effectively on the characters and after-careers of the pupils is still largely a matter of conjecture.

35. Direct Moral Instruction continued to be given in all high schools during the year on the lines indicated in the last year's report; opinion as to its positive value in building up boys' moral character is still sharply divided. The Moral Education Consultative Committee did not meet last year as none of the members had anything to suggest for discussion or consideration. Out of the sum of Rs. 40 available from the interest of the endowment of Rs. 1,000 placed by a Parsee resident of Bombay at the disposal of Government for the encouragement of moral instruction two gold medals of the value of Rs. 20 each were awarded during the year for the best moral lessons given in the Training Colleges for Men, Poona, and the Training College for Women, Dharwar.

36. Medical Inspection.—While the Government scheme for the medical inspection of pupils in secondary schools has been held up owing to the war, interest continues to be evinced in an ever-increasing measure in this subject by some of the leading schools in Bombay and Poona. It is reported that 21 schools in the Central Division have arranged for medical inspection of one kind or other, prominent amongst them being the New High School, the J. N. Petit Parsee Orphanage, the Esplanade High School, the B. J. Parsee Charitable Institution and the Anjuman-i-Islam High School, Bombay, and the New English School, Poona. It is worthy of note that the New High School, Bombay, which is a day school only, has engaged on its permanent staff a qualified medical man for the treatment of pupils.

37. Physical Training.—Although Wren's physical exercises are practised in all Government schools under the direction of the class teachers and a certain amount of drill is also taught by the school gymnasts, there is still no graduated and progressive course in physical training. The need of such a course and of expert direction of physical training has been keenly felt for a long time past, and with a view to remedying this defect proposals to obtain through the Young Men's Christian Association a Director of Physical Training were made and sanctioned during the year. But the appointment has had to be postponed owing to the impossibility of securing the services of

a suitable man for the post in consequence of the call upon the services of such men for the training of the American Army.

38. School Work and Methods.—On this subject Mr. Marrs offers some very interesting remarks. He observes: "The last reports of examiners for the School Final Examination do not indicate great progress in method. In English, the most striking feature was that of the carelessness of the candidates, shown in several ways. Questions were not carefully read, writing left much to be desired, arrangement of answers was not good, spelling was often unsatisfactory. Some boys even transcribed words from the question papers incorrectly. These faults are mentioned specifically because, in my opinion, they are to be attributed to want of careful and individual supervision of boys' work in the early stages when habits are being formed. Some schools realize the importance of this supervision and are showing considerable improvement, but the examiner's report indicates that they are still in the minority. In Mathematics also, much of the work was slovenly. In Marathi, the general fault was want of accuracy and care. It is difficult in the face of such reports to conclude that the teaching is not at fault. Geography, being a subject which can be neglected without fear as to the examination results, does not receive the attention its importance deserves. In some schools I have advised teachers to discontinue the teaching of English by the direct method. The method in the hands of inexperienced teachers who cannot use it effectively and who give little promise of improvement cannot be recommended. In view of the advice given it is interesting to note the remarks made by an Inspector in the United Provinces. He says that it is difficult to persuade headmasters that any teacher who has a fair knowledge of English and a good grip on his class can teach the language by means of conversation provided he will take the trouble to prepare his lessons thoroughly beforehand and also to put himself behind the pupils' minds. It is when the attainment of the two requirements is despaired of that I have discouraged the direct method. As the regulations of the Joint Examination Board do not provide for the answering of question papers through the medium of any other language than English, the extension of teaching through the vernacular has been checked. The policy in Government schools is to encourage the use of the vernacular outside the English lessons up to and including standard V, especially in a subject like history. I have to speak from memory, but I believe I am correct in stating that no school attempts to teach arithmetic, geometry, science and geography through the medium of the vernacular only for the first five years of school life, because of the very real difficulties that arise through the need for the use of two sets of technical terms before the completion of the school course, and because a sudden change from, e.g., geometry wholly through the vernacular in one standard to geometry wholly through English in the next, is unthinkable. If we concentrate our efforts on producing a body of trained teachers whose minds have been developed so as to make them capable of grappling with a situation and finding a sensible solution, and who believe that a little thought and experiment are preferable to blind reliance upon tradition, we may be confident that a reasonable *via media* will be found. . . . The key to efficient teaching is in the hand of the teachers and, although the nature of the medium of instruction may make some difference in the ease with which it is imparted, the teacher is the pivot upon which the soundness of education really turns. In making these remarks I have had in mind schools where extended use of the vernacular is believed in and aimed at, but there are schools, usually in Bombay and with a majority of Parsi pupils, where the vernacular is despised and does not figure in the curriculum either as a subject or as the medium of instruction after standard III. Some of these schools would prefer to throw over the vernacular even in standards I-III." As regards the last class of school referred to by the Inspector it is surely an absurdity that in a so-called Anglo-Vernacular course the vernacular should be ignored or reduced practically to nullity, especially when the pupils concerned are 'Indians' by birth, recent descent and domicile. On the other hand, if the just claims of the vernacular are duly provided for, it is not necessary for the Department to forbid an extension in the use of English in schools where such extension will not prove detrimental to the efficiency of the general course of instruction.

39. Results of the Matriculation and School Final Examinations.—

The numbers of students presented and passed at the Matriculation Examination were 5,583 and 2,923 respectively and at the School Final Examination 1,137 and 524 respectively. Among the Government High Schools, the Shikarpur, Surat, Thana and Ratnagiri High Schools figured most prominently in the Matriculation results; the Karachi, Surat and Dharwar High Schools in the School Final results, and the Surat, Elphinstone, Ratnagiri, Karachi and Thana High Schools in the Matriculation and School Final results taken together. A boy of the Surat High School stood first in Mathematics at the Matriculation Examination and carried off the Nusserwanji Bansa prize of Rs. 50 and a girl of the Ratnagiri High School stood first in Sanskrit and won the first Jugonnath Sunkarsett Sanskrit Scholarship of the value of Rs. 18 per mensem and tenable for 2 years. The five prizes of the value of Rs. 20 each awarded to the best students in English at the School Final Examination from the interest of the endowment of Rs. 4,000 made by a Parsee resident of Bombay were carried off by 2 students of the Karwar High School, 1 student of the Surat High School, 1 of the Shikarpur High School and 1 of the Deccan Education Society's New English School at Satara.

CHAPTER VI.

PRIMARY EDUCATION.

40. Schools and Pupils.—The most notable feature of the year in regard to primary education was the renewal of the provincial grant of Rs. 2 lakhs for the improvement and extension of primary education, which had been suspended since 1914-15 in response to the call for economy in educational expenditure necessitated by the present war. Half of this grant was allotted for the opening of new schools. Owing to this favourable circumstance, the number of primary schools for boys increased during the year from 9,645 to 9,951. The number of pupils, however, far from showing any increase, as might be expected, shows a decrease of about 1 per cent from 570,354 to 565,737. The decrease was contributed to chiefly by the Northern Division, all the five Gujarati districts of which suffered from a very virulent recrudescence of plague. The Inspector reports that the disease levied on the primary schools a heavy toll of 2,000 lives—82 teachers and 2,017 pupils. In the Southern Division too, plague prevailed and a decrease of over 2,500 pupils took place. In Sind, the numbers fell owing to the unusually unhealthy cold weather and to the failure of crops in certain parts of the province.

41. Of the schools 82 per cent are board schools with about 85 per cent of the total number of pupils; the Government schools number 23 and have an attendance of 2,411 only. Of the board schools about eight-ninths belong to district local boards and one-ninth only to municipalities. Of the pupils, board schools claim six-sevenths divided between municipal and local board schools in the proportion of 1:3. 58 per cent of the pupils in local board schools are children of cess-payers who, except in Sind, pay reduced fees; and 41 per cent pay no fees whatever. In Sind, the range in the rates of fees (6 pies to annas 2 in the highest standard) is so small that there seems little room for reduction in the case of cess-payers. In Sind, the percentage of children paying no fees is 73.6.

42. Of the total number of pupils, Brahmins form 10.2 per cent, non-Brahmins 65.2 per cent, Mahomedans 18.6, Indian Christians 1.8, Parsis .7, Jains 3.0. It is remarkable that Mahomedans form a larger proportion of the pupils than Brahmins in all the divisions.

43. Out of every 21 pupils 19 belong to the lower primary stage comprising classes up to standard IV, and 2 only to the upper primary stage comprising the higher standards V to VII. The number in the upper stage is half that returned last year owing to the statistical transfer of pupils belonging to standard IV from the upper to the lower stage in accordance with the new grading of primary schools that has come into force from the year under report in compliance with the orders regarding the abolition of the rural standards. It is noteworthy that one out of every 7 boys studies up to the higher vernacular standard V, VI or VII in the Northern Division; one out of every 11 in Sind; 1 out of every 12 in the Southern Division; and 1 out of every 15 in the Central Division.

44. Expenditure.—Direct expenditure on primary schools for boys rose during the year from Rs. 53,71,241 to Rs. 57,54,885, i.e., by about 7.1 per cent. Of this, 58 per cent was met from provincial funds, 16 per cent from municipal funds, 9 per cent from local funds, 7 from fees and 9 per cent from private sources. Of the expenditure from provincial funds, 12.5 per cent represented grants to municipalities, 81.8 per cent grants to district local boards, and 4.7 per cent grants to schools under private management. The proportion of grants to expenditure was 40.6 per cent in the case of municipalities (excluding Bombay), 80.3 in the case of district local boards, and 21.3 per cent in the case of privately managed schools. Mr. Hesketh observes that the chief need of aided primary schools is a higher rate of Government grant: this, he thinks, should be at least half the expenditure. I am disposed to agree with the Inspector. The above expenditure excludes expenditure on scholarships amounting to about half a lakh. The average annual cost of a primary school for boys increased from Rs. 556 to Rs. 578

and that of educating each pupil in such schools from Rs. 9.3 to Rs. 10 (the latter in a local board school being Rs. 9 and in a municipal school Rs. 13). The incidence of school fees per head declined from annas 11 pies 11 to annas 11 pies 8.

45. **School Buildings.**—The Taluka School Fund Associations in the East Khandesh district constructed 13 buildings and handed them over to the District Local Board. The District Local Board, Satara, has, in order to accelerate progress in this direction, appointed a special officer to look after Local Board School building operations. In the Surat district, several private persons erected suitable buildings more or less on the pattern of Local Board buildings and handed them over to the District Board for school purposes. In the course of the year popular contributions amounting to Rs. 7,700 were raised in this district for school buildings, and 5 new buildings were erected and one existing building enlarged. In Sind, 9 new buildings were erected and 19 existing ones extended during the year; and the experiment of putting up cheap 'chapar' *landhis* is being made in desert tracts. The Inspector, Northern Division, suggests that the provision of school buildings for board schools might be accelerated by giving building grants to the boards concerned in advance so as to enable them to start the works at once; the unspent balances, if any, being required to be refunded to Government on their completion. The Inspector, Southern Division, pleads for further simplification of the grant-in-aid rules and observes that if it can be arranged to have some simple plan for cheap buildings (such as villagers usually build) prepared for the guidance of villagers and to pay the villagers the promised grants in instalments according as the work progresses, schools will have suitable buildings erected for them more speedily than under the present lengthy and laborious procedure. A type plan for a one-teacher primary school for 30 boys has been approved by Government since the close of the year.

46. **Examinations.**—The following table shows the Vernacular Final Examination results in 1917-18 as compared with those in the preceding year:—

		Northern Division.	Central Division.	Southern Division.	Sind.	Total.
Number appeared	1916-17	1,616	2,786	1,992	1,711	7,613
	1917-18	1,331	2,227	1,923	811	6,612
Number passed	1916-17	631	1,137	836	643	3,207
	1917-18	704	1,059	702	429	2,904

From the numbers presented and passed in the examination at the different centres it appears as if the examination were losing its popularity. The Inspector, Northern Division, explains that many boys leave the school without passing the examination and find lucrative employment in business or in private service, with the result that qualified men are not as easily available as formerly to serve as assistants on Rs. 10 in small out-of-the-way village schools. It is proposed to hold the Vernacular Final Examination henceforward in April, instead of in September as at present, soon after the vernacular IVth standard examination, the time of which has been shifted to February to facilitate the admission of pupils from vernacular to English schools.

47. **School Committees.**—Members of local board school committees were ordinarily appointed for life. This arrangement tended to slacken the interest of the members, as they grew old, in school work. The President of the District Local Board, Kaira, questioned the soundness of this procedure and suggested that the membership be limited to 3 years. This suggestion having been approved by the Presidents of the other District Boards of the Northern Division has been adopted in that Division and will be given effect to from August, 1918.

48. **Teachers.**—The number of teachers in primary schools (for both boys and girls) rose from 25,133 to 25,659. Of these teachers, 9,930 or 38.7 per cent were trained. The proportion of trained teachers was the highest in

municipal schools, viz., 47.6 per cent, that in local board schools being 40.5 per cent, in aided schools 15.9 and in unaided schools 14.2.

49. Pay of Teachers.—The question of the improvement of the pay of Vernacular school teachers was the subject of prolonged discussion during the year, and as a result of it, as an urgent measure, the minimum pay of the untrained assistant teachers was raised from Rs. 9 to Rs. 10 and that of the untrained headmaster from Rs. 11 to Rs. 12. Untrained headmasters with 15 years' service as headmasters were given Rs. 15 and the full face value of their training certificates was given to all trained teachers not yet in receipt of it. These improvements were facilitated by the Government of India grant of 2½ lakhs for the improvement of the pay and training of teachers. The question of raising these minima still further and of improving the pay and prospects of the different classes of trained teachers on definite lines is under consideration. The rise in the prices of food-stuffs and all other necessities of life caused by the present war has made the demand for more pay to primary school teachers more insistent than ever; and the example of England which has been treating this question as a war measure has greatly stimulated and strengthened the demand. The Right Honourable Sir Herbert Fisher, the President of the English Board of Education, has recently been emphasizing the danger of a discontented teaching staff, and, if prospects of promotion are too slow or too remote, discontent is inevitable. This is more especially true at the lower stages. A practical demonstration of this truth was afforded by the untrained teachers' strike in January, 1918, in the Surat district. The strike continued from January to March and in all 431 teachers participated in it. Of the strikers, 371 returned to duty at the close of the year. Attempts on the part of the leaders to spread the movement to other Gujarati districts failed on account of the vigilance of the local educational officials. The Collector of Surat thought that, whatever other influences might have abetted the movement, the root cause of it was economic, viz., the abnormal rise in prices which hit these lowest paid teachers the hardest.

50. The case of the untrained teachers is difficult. But it is not so in this country alone. As the report of the Director of Education, Transvaal, for the year 1917 shows, the same difficulty is experienced in regard to what are called "uncertificated" teachers in that colony. On the one hand it is bad policy to bolster up inefficiency. The Vernacular Final certificate which the untrained teachers in this Presidency hold represents the minimum general educational qualification and connotes no training whatever for teaching work. The question is whether they ought to receive more than they do now. If they get themselves trained or complete 15 years' approved service they qualify themselves for pay on the scale laid down for teachers who have passed through the Training colleges. If untrained teachers fail to qualify for higher pay on the above terms, should indolence or incapacity be encouraged by increased emoluments? That is one side of the question. On the other hand it has so far proved impossible to do without these untrained teachers. So long as we are compelled to employ men of this relatively low calibre, we should pay them, at any rate, what is a real living wage and will secure their self-respect. At the same time, however, we must avoid putting a premium on this class of teachers to the disadvantage of the trained men.

51. Education of Teachers' Children.—With regard to the question of exempting children of female teachers from the levy of school fees, Government have decided that the exemption should be granted to the children of all Indian and European female teachers drawing Rs. 100 or less per mensem in schools of all grades and under all classes of management.

52. Free and Compulsory Education.—The Honourable Mr. V. J. Patel's bill permitting under certain conditions district municipalities to introduce free and compulsory elementary education in the municipal areas was passed during the year by the Bombay Legislative Council and was, with the approval of the Government of India, placed on the statute book in April, 1918. Children who have completed 6 years but not 11 will under this Act be liable for compulsory education. Rules under section 18 of the Act indicating *inter alia* what constitutes adequate provision for free and

compulsory education have since been framed and are awaiting Government sanction. In the meantime, the Bandra and Surat municipalities have already applied for permission to introduce compulsory education and have proposed to levy additional taxation in order to raise the extra funds required for the purpose. To the cost of free and compulsory education introduced under this Act Government propose to contribute ordinarily to the extent of one-half. The Bombay Municipality also has drawn up a programme for the rapid extension of primary education in Bombay city within the next 10 years with a view to preparing the ground for the introduction of compulsion at the end of the 10 years' period. The scheme has been submitted to Government for sanction.

53. Since the close of the year, Government have also announced their policy in regard to free primary education and declared that any municipality wishing to introduce it will be permitted to do so provided that it undertakes (i) to provide such additional accommodation, staff and equipment as may be necessary to meet the increased number of pupils and (ii) to provide sufficient funds, by taxation or otherwise, to meet its own share of the increased expenditure involved.

54. **Education of Children of Agriculturists.**—The 'part-time' experiment tried in the Central Division and described in paragraph 233 of my last Quinquennial Report is reported to have produced good results but it has met with such determined opposition from the villagers as to render its general extension inadvisable.

55. **Education of Children in Factory Employ.**—The attendance in the Government factory school at Sholapur was 39 and in the three private schools in the Morarji Mill 620. Another private school started in the same town by the Narasinggirji Mill had an attendance of 51. The number in the Government school at Gadag declined from 49 to 19. In Bombay city there were 9 schools with 409 children as against 10 schools with 465 children returned last year. The teaching staff in some of the schools was insufficient and all the existing teachers were unqualified. In these circumstances the progress could not but be unsatisfactory. The Schools Committee, Bombay, attached 2 classes to ordinary Marathi schools for the education of half-timers, at which the attendance was 123. Thus, out of a total of 2,646 half-timers in the Bombay mills and factories, 532 only were under instruction. The factory school maintained by the Ahmedabad municipality had 54 boys learning up to standard III, while the factory classes conducted by Mrs. Anasuya had 140 pupils in them. The number in the Viramgam school dwindled down to 4 and that in the 3 I. P. Mission schools at Broach to 77, of whom 67 belonged to the depressed classes, 6 were aborigines and 4 were of other castes.

56. **Night Schools.**—The number of night schools increased from 111 to 129 and the pupils attending them from 3,197 to 3,655. The increase in schools and pupils was chiefly in the Central and Southern Divisions. In the latter division, Mr. Starte, I. C. S., the Special Officer for the Settlement of Criminal Tribes, opened 3 more schools for the children in his Criminal Tribes Settlements and the Depressed Classes Mission opened 2 more. The attendance in the 5 Criminal Tribe Schools increased from 71 to 234 and in the 3 Depressed Classes Mission Schools from 24 to 59. The latter schools are all aided by Government. It is reported that no regular provision exists for the education of 152 children under 10 years of age working in the military factories at Kirkee and 80 children working as half-timers in the Poona Silk and Cotton mills. Nearly 34 of the children working in the Kirkee factories attend the privately managed night schools at Kirkee, Bopodi, Fuge Wadi and Dapodi. In this connection special mention is made of Mr. Alegaonkar of Kirkee, who under the advice of the Assistant Superintendent of the Ammunition Factory first started two night schools at Kirkee, one Anglo-Vernacular and the other primary, mainly for the employes of the factories, and being encouraged by good attendance in them opened similar schools in the places mentioned above. As all the schools are reported to be well conducted and deserving of encouragement, I am directing the Inspector to take them on the grant-in-aid list.

57. **English Teaching in Primary Schools.**—The question of introducing the teaching of English in the upper standards of primary schools is still under discussion. Another resolution on the subject was moved by the Honourable Mr. Paranjpye in the Legislative Council in March, 1918, but it was postponed to enable further inquiries to be made and to permit Mr. Paranjpye to prepare a definite scheme. A special case in which English is regularly permitted to be taught in primary schools in this Presidency is that of the Native Christian schools in the Salsette and Bassein talukas of the Thana district. The ordinary village vernacular schools having failed to serve the needs of the Native Christian population of these parts Government decided in 1909-10 to allow schools meant for children of this community to teach English in place of the local vernacular from the Infants' class upwards in addition to the other subjects of the ordinary primary school standards. A special curriculum on these lines has been sanctioned for these schools and is in use.

CHAPTER VII.

PROFESSIONAL COLLEGES AND SCHOOLS.

58. **Law.**—The number of students in the Government Law School, Bombay, increased during the year from 511 to 650 and its fee-receipts from Rs. 48,770 to Rs. 62,391. The expenditure amounted to Rs. 35,975 only. The large increase in the number of students rendered duplication of the 2nd I.L.B. Class necessary from June, 1917. At the final I.L.B. examinations held in 1917-18, 465 candidates appeared and 200 passed, against 436 and 158 respectively in 1916-17. In November, 1917, Government issued their orders on the recommendations of the Law School Re-organization Committee, sanctioning an increase in the number of professors from 6 to 10, limiting the number of students taught in each class to 150 and increasing the number of classes from 4 to 5. Effect is being given to these orders.

59. **Engineering.**—The equipment of the hydraulic section of the new laboratory at the College of Engineering, Poona, was completed during the year. The total number of students in the College increased from 322 in 1916-17 to 344, of whom 196 were in the University section and 148 in the Mechanical, Electrical, and Sub-Overseers' Classes. No Maratha scholar belonged to the College proper but there was one in the College Workshop; his scholarship was raised from Rs. 5 to Rs. 7 on promotion from the 2nd to the 3rd year class. At the B.E. examinations, 35 out of 43 passed in Civil Engineering and 2 out of 2 in Mechanical Engineering, against 45 out of 68 and 2 out of 3 respectively last year.

60. The passes at the Fourth Grade Accountants' examination of the Public Works Department were very low this year owing to poor results in Book-keeping, 6 only out of 48 (against 14 out of 59 last year) having come out successful.

61. The Engineering Class attached to the D. J. Sind College, Karachi, had an attendance of 36 and an expenditure of Rs. 7,586, of which Rs. 2,900 was contributed by Government as its permanent grant to it.

62. **Commerce.**—On the recommendation of the Advisory Board of the Sydenham College of Commerce and Economics, the number of admissions to the College was definitely restricted in June, 1917, to 70, and for the first time a test was imposed on candidates for entrance, with the object of discriminating between promising and unpromising students. The number of students in the College at the end of the year was 235, of whom about one-sixth were from other provinces. The Principal considers that these outside students are generally superior in attainments to the Bombay students by reason of their having spent *two* years at an Arts College as against *one* demanded of the latter by the Bombay University. As he observes, the mere fact that they are willing to come from great distances is presumptive evidence of their keenness. The teaching staff of the College engage in much tutorial work which, in the higher classes, is supplemented by 'seminars'.

63. At the final B.Com. examinations held during the year, 164 students appeared and 52 passed. The Principal reports that none of the passed men experienced any difficulty in securing employment.

64. The fee receipts of the College amounted to Rs. 35,601 and the expenditure to Rs. 77,388.

65. **The Accountancy Diploma Board.**—The special classes started in June, 1916, at the Sydenham College of Commerce and Economics and at Davar's College of Commerce, Bombay (the latter is a recognized institution under private management), to prepare candidates for the Government Diploma in Accountancy completed their course in March, 1918. For the benefit of those who thus completed the course, special sanction was granted by the Government of India to hold the first Diploma Examination in Bombay in April, 1918, under the regulations that had been submitted to that Government in January, 1916. The examination was confined to candidates of this

Presidency and was entrusted to 4 experts of the Diploma Board who undertook to set the questions and value the answers. Of the 42 candidates who appeared 12 only passed.

66. **Teaching.**—In March, 1918, the Secondary Training College, Bombay, suffered a grievous and irreparable loss in the death of its Principal, Mr. J. N. Fraser, who was carried off by small-pox after a short illness. He had been in charge of the College since its foundation in 1905 and had worked for it with whole-hearted devotion. But the influence of his work was not confined to the walls of the College. It spread far beyond and made itself felt in Anglo-Vernacular schools situated in the remotest corners of the Presidency. The idea of the 'direct' method of teaching English to Indians in secondary schools originated in this Presidency with Mr. Fraser and the large extent to which it is now used in schools is due to the untiring zeal and devotion with which he applied it himself in practice and demonstrated its value to secondary school teachers at large as well as to students training under him.

67. The splitting up of the post of the Vice Principal and the creation therefrom of three minor posts of Demonstrators in English, Mathematics and Science since April, 1917, has rendered it possible for the staff to do more demonstration work and has afforded the students under training more opportunities for practice in teaching.

68. The number of students in the College at the beginning of the year was 34, but it was reduced to 31 owing to the death of 2 students and the serious illness of a third. At the Diploma examination held in March, 1918, 30 students passed and 4 failed. Some of the students of the College displayed educational exhibits of their own making at the Exhibition of Educational Work organized in February last by Miss Burnett Hurst.

CHAPTER VIII.

TECHNICAL AND INDUSTRIAL EDUCATION.

69. The number of technical and industrial schools under the control of the Committee of Direction for Technical Education remained the same as last year, viz., 20, while the total number of institutions formally classified as 'technical' rose from 26 to 27. Those not under the Committee are for the most part manual training or needle-work classes. The number of pupils in the Committee's schools was 1,113, while the total for all technical schools was 1,782. Of these institutions, two only are under Government management, viz., the R. C. Technical Institute, Ahmedabad, and the workshop at the College of Engineering, Poona.

70. **The R. C. Technical Institute, Ahmedabad.**—The number of students on the rolls of the R. C. Technical Institute declined from 82 to 60. The Principal attributes this decrease chiefly to their poor preliminary qualifications, particularly in Mathematics and Drawing (some of the students seeking admission into the Institute are those who have failed in the annual examinations of the local Anglo-Vernacular schools and are unable to prosecute their secondary school studies further), and their consequent inability to proceed with the course taken up; to their poverty which prevents them from continuing their studies at the Institute without maintenance scholarships; to their general physical weakness which renders them unable to hold on with the hard and continued work on the machines; and to want of hostel accommodation for the students, a large number of whom come from different parts of Gujarat and Kathiawad. The Institute was considerably disturbed during the year by the prevalence of plague which compelled suspension of its work for more than 3½ months. The subjects taught at the Institute comprise Mechanical Engineering, Cotton Spinning and Cotton Weaving, and the course in each is distributed over three years. The results of the annual examinations held by Messrs. Dawson and Pomfret of the V. J. Technical Institute were satisfactory, 18 having passed out of 56 presented. 16 of the passes were in the first year, 11 in the second and 21 in the third. The examiners remark that there is a general all-round improvement in both theoretical and practical work. Of the 26 students who left the Institute during the year, 18 were first-year students, 6 second-year and 2 third-year. These figures show that the largest number leave from the first year owing to one or other of the causes noted above.

71. **The V. J. Technical Institute.**—The number of students on the rolls of the Institute in March 1918 was 330 against 339 in 1917. Of these, 5 were Europeans and Anglo-Indians, 28 Indian Christians, 65 Parsis, 13 Mahomedans, 5 Jews, 3 Jains, 1 Lingayat, 90 Brahmins and 120 other Hindus. The average age of the students was 19 years, and there are indications that a better class is now being attracted to the Institute. The subjects in which instruction is provided comprise Mechanical, Electrical and Sanitary Engineering, Textile Manufacture and Textile Chemistry. Competition for admission to the Electrical Engineering section is very keen and many candidates have to be refused admission owing to lack of accommodation. In the Mechanical Engineering section Government Munitions work has been carried on for some months past and this work is still proceeding. At the Diploma Examinations of the Institute held in March, 1918, 25 certificates were awarded in Mechanical Engineering, 20 in Electrical Engineering, 3 in Textile Manufacture, 1 in Textile Chemistry and 7 in Sanitary Engineering and Plumbing.

72. The expenditure on technical and industrial education rose during the year from Rs. 4,00,200 to Rs. 4,13,591.

73. Two State Technical Scholarships were awarded during the year: (1) for glass-making to Mr. G. D. Kelkar, B.A., of the Fergusson College, and (2) for Sanitary Engineering and Sewage Disposal to Mr. N. V. Modak, B.E., of the Government Sanitary Engineering Department.

74. **Sir J. J. School of Art.**—The number of students in the School was 238 and in the Reay Art Workshops 156 as against 327 and 170

respectively last year. The acting Principal finds it difficult to assign precise and sufficient reasons for the decline in the numbers. Of those in the School, 47 were in the Elementary Drawing School and 90, 33, 27, 15 and 76 respectively in the Painting, Modelling, Drawing Teacher's, Special Shading, and Architectural Classes. The 156 students in the Workshops were divided as follows:—22 Engraving, 1-Copper and Brass, 11 Gold and Silver, 15 House Decoration, 11 Carpetweaving, 16 Carpentry, 30 Wood-carving, 24 Copper and Brass Embossing, 11 Stone-carving and 15 Iron. The monthly average number of students on the rolls of the Pottery Department and Sir George Clarke Technical Laboratory and Studio was 53.

75. Besides the ordinary work of the School, work of what may be termed a semi-war nature was undertaken during the year. Many patterns and designs suitable for embroidery were prepared and distributed to the several war hospitals in Bombay, where wounded and sick soldiers copied them while lying in their beds. Some of the articles so prepared were exhibited and sold at the Exhibition and Fancy Fair held in the Town Hall, Bombay, in November, 1917. The work done by the School was very much appreciated both by the soldiers and the visiting workers at the hospitals. In the Pottery Department, a series of experiments in the manufacture of plumbago crucibles was carried out on behalf of the Indian Munitions Board.

76. The acting Principal reports that in regard to the Normal Class for Drawing Teachers an effort has been made to eradicate some of the defects noted in the report of 1914-15, more particularly in respect of equipment. Until, however, the existing staff provided for this class can be replaced by men who have better and more up-to-date qualifications for training teachers in this subject, improvements in mere material can effect but little.

77. At the end of the year Mr. Burns retired after a period of 16 years of strenuous work as Principal. In him the School loses a Head of much organizing and administrative capacity and one who has developed its sphere of practical utility in a variety of directions.

78. **School of Drawing and Design, Ahmedabad.**—The number of students in the Morning Classes increased during the year from 23 to 27, of whom 23 were sons of *bona fide* craftsmen. The number, however, in the Evening Classes declined from 15 to 8. The latter classes comprise chiefly students of the local educational institutions: 2 were school mistresses belonging to the Mahalaxmi Training College for Women. Two students of the Evening Class obtained admission to the Normal Class for Drawing Teachers at the School of Art, Bombay. The work of the School was disturbed considerably by plague which necessitated suspension of its work for a long time. The experimental period of the School expired in June, 1918, and the question of its further continuance amid more suitable surroundings is under the consideration of Government.

79. **Commercial Schools and Classes.**—The number of commercial schools and classes increased from 39 to 44 and of pupils attending them from 1,880 to 2,461. Most of these are private institutions unaided by Government and drawing their chief support from fees. The number of entries for the Junior and Senior Examinations of the London Chamber of Commerce decreased from 152 and 653 respectively in the previous year to 104 and 637, while the number of passes show a slight increase from 230 to 235 in the case of the Senior Examination and a slight decrease from 31 to 27 in the case of the Junior.

80. **Music Schools.**—There are 5 music schools and classes with 1,132 pupils in the Central Division and 1 with 110 pupils in the Southern Division. They are all aided and receive Government grants amounting in all to Rs. 1,123.

CHAPTER IX.

TRAINING OF TEACHERS.

81. **Special Events.**—The subject of the training of teachers, primary and secondary, came under comprehensive consideration in the course of the past year as the result of the suggestion made by the Government of India in their circular letter No. 813, dated the 30th August, 1916, for the formulation of definite lines of progress in this direction. Detailed investigation in the matter showed that while the total number of trained vernacular teachers turned out every year from the existing vernacular training institutions was about 950, the total number of teachers actually required (on the basis of 1915-16 figures) to meet the needs of normal expansion and to make up for wastage caused by deaths, retirements, resignations, etc., was about 2,250. The annual shortage in the supply of trained teachers thus comes to 1,300. To make good this annual deficit it has been decided by Government to establish 26 first year training classes consisting of 50 students each in each district of the Presidency. The scheme should be in force as a whole in four years commencing from the current year and is estimated to cost Rs. 3,00,000 recurring and Rs. 26,000 non-recurring, including the necessary provision for the creation of a new post of Inspector of Training Schools. It is hoped that this arrangement will go a great way towards meeting the present demand for trained teachers.

82. The question of increasing the output of trained teachers for secondary schools was also considered very fully but definite action in the matter has been postponed till the improvement of the present financial situation.

83. **General Statistics.**—As general table IX will show, there are in all 30,100 teachers serving in all classes of institutions and under different forms of management; of these, 11,011 or 36·6 per cent only are trained. Of the trained teachers, 9,930 or 90·1 per cent are in primary schools and 1,081 or 9·8 per cent are in secondary schools. The percentage of trained teachers in primary schools at present is 38·7 and that in secondary schools 24·3. The proportion of trained teachers in primary schools to the total number of primary teachers is 43·2 per cent in the Northern Division, 32·7 per cent in the Central Division, 43·4 per cent in the Southern Division and 40·2 per cent in Sind.

84. Excluding the Secondary Training College, Bombay, (which is dealt with in the chapter on Professional Colleges), there are 41 training institutions in the Presidency, of which 38 are primary and 3 secondary (all for European mistresses); 24 for men and 17 for women. Of these, 9 are Government institutions—5 for men with 1,242 students and 4 for women with 341 students. 18 are board institutions: of these, 1 is the normal class for female teachers maintained by the Karachi municipality, 1 is the new 1st year training class for male teachers started during the year under report by the Surat municipality and 16 are the district normal classes (with an attendance of 110) maintained by district local boards from funds specially assigned by Government for this purpose. These district normal classes not having proved quite satisfactory, it has been decided under the comprehensive training scheme mentioned at the beginning of this chapter to abolish them simultaneously with the establishment of the proposed new training classes.

85. Of the students under training, *among males* 1,128 are Hindus, 233 Muhammadans and 86 Indian Christians, as against 1,159, 192, and 80 respectively last year; and *among females* 393 Hindus, 46 Muhammadans and 202 Indian Christians against 400, 44 and 194 respectively reported last year. These figures show that the proportion of Muhammadans and Indian Christians under training is steadily increasing.

86. **Output of teachers.**—The output of teachers, male and female, from the Government Training Colleges in the year 1917-18 was as follows:—191 male and 70 female in the Northern Division; 375 and 28 respectively in the Central Division; 169 and 10 respectively in the Southern Division and 55 and 25 respectively in Sind. The output of 1st year trained teachers from the Urdu Training Class at Ahmedabad was 27 (exclusive of 6 teachers who appeared at and passed the annual examination as outside candidates).

87. **Expenditure.**—The expenditure on training institutions increased during the year from Rs. 3,95,429 to Rs. 4,16,871 owing chiefly to an increase in the number as well as in the rates of stipends to teachers under training. For this purpose Rs. 28,008 were allocated from the 2½ lakh grant received during the year from the Government of India for the pay and training of teachers.

88. **The Poona Training Class**, which was started for instructing teachers of aided secondary schools in the Direct Method of teaching English and, if possible, in the methods of teaching one or two other subjects, has not found it possible to render practical help in subjects other than English: it has confined itself to the Direct Method of teaching English only. In other subjects, only theoretical instruction is given and that at the weekly lectures which cover all school subjects. The class embraced within the scope of its work during last year four schools in Poona, viz., the Poona Native Institution, the Nutan Marathi Vidyalaya, the Union High School and the Sardar Dastur High School for Boys, which the instructors regularly attended. Besides practical instruction in these schools, the instructors delivered a course of lectures at the New English School, Poona, on Saturdays, one of them lecturing on the teaching of English, History and Geography and the other on the texts prescribed for the S. T. C. examination. The average attendance at these lectures was 12. In all, 10 teachers were under training during the year. Of those under training who appeared for the S. T. C. examination, 5 passed. The series of open lectures mentioned at the end of paragraph 298 of my last Quinquennial Report could not be arranged last year for want of lecturers; there was only one lecture by Professor Patwardhan of the Fergusson College on "How to teach English History" at which the attendance was about 150. The class has during the four years of its existence helped 7 schools in Poona and undertaken the training of 43 teachers, of whom, however, 12 left the profession and 7 joined other schools. Of the teachers trained, 14 in all have passed the S. T. C. examination during the past 4 years. Since March, 1918, the class has been transferred to Ahmednagar. These results can scarcely be considered adequate, but until definite provision for the extension of our agencies for the training of secondary teachers can be made, it would be premature to abolish this somewhat makeshift arrangement.

CHAPTER X.

ORIENTAL STUDIES.

89. The numbers of students who obtained B.A. Honours in Oriental languages at the University at the end of 1917-18 were: 71 in Sanskrit and 5 in Persian. At the M.A., 5 passed with Sanskrit, and 1 with Persian. The Wilson Philological lectures for the year were delivered by Mr. N. B. Divetia on Gujarati language and literature. They were very popular, and are considered so valuable that the University has decided to publish them in book-form.

90. **Special Institutions.**—Instruction in Oriental languages is also imparted in Sanskrit pathshalas, Arabic madressas, and such other special institutions. The number of pathshalas in 1917-18 was 57 with 3,391 pupils, and of madressas 108 with 2,052 pupils. The total number of such institutions last year was 165 with 4,254 pupils.

91. **Personal Allowances** given to Shastris and Moulvis employed in Government educational institutions amounted in 1917-18 to Rs. 900 and to those not so employed to about the same figure.

92. **The Bombay Sanskrit and Prakrit Series.**—One old work of this series was reprinted during the year; and 2 new works were added to it. Proposals for the transfer, under certain conditions, to the Bhandarkar Oriental Research Institute, (1) of the valuable Government library of Sanskrit manuscripts deposited at the Deccan College, along with the grant of Rs. 3,000 per annum allotted for its maintenance, and (2) of the work of publication of the Bombay Sanskrit Series, with the grant of Rs. 12,000 per annum made for the purpose, were discussed during the year and have since been sanctioned. The K. R. Cama Oriental Institute also received during the year the grant of Rs. 30,000 which had been promised it by Government at its inception.

CHAPTER XI.

EDUCATION OF GIRLS.

93. **Numbers.**—Girls' schools (including those for Europeans) increased during the year from 1,301 to 1,390—public from 1,216 to 1,293 and private from 85 to 92. The number of girls under instruction also rose from 144,621 to 148,687 (including 53,725 studying in boys' schools). The following table gives the numbers of girls' schools and of girls under instruction and their percentage to female population in the different divisions:—

Division.		Number of girls' schools.	Number of girls at school.	Percentage of girls to female population.
Northern	...	347	44,533	2.6
Central	...	451	50,890	1.5
Southern	...	278	80,515	1.2
Sind	...	251	15,720	1.1
Aden	...	10	443	2.9
Total		1,347	143,171	1.6
		+ 43 European and English-teaching schools = 1,390.	+ 5,516 girls in European and English-teaching schools = 148,687.	

94. Of the total number of girls under instruction, 138,899 are in public institutions and 9,788 in private institutions. Of those in public institutions, 128 are in arts colleges, 56 in the Grant Medical College, 9,639 in secondary schools, 127,868 in primary schools, 771 in training institutions, 20 in the School of Art, 19 in medical schools, 214 in technical and industrial schools, 67 in commercial schools and 117 in other schools. Government maintain 2 high schools for Indian girls at Poona and Ahmedabad which have an attendance of 332 and 234 respectively against 325 and 233 last year. The Inspector urges the need of separating the latter from the Training College to which it is attached. These are the only Government girls' schools of their class and the need of more institutions of the same character is greatly felt. Expression has been given to this need in Council and Government have agreed to an extension of the Government system of secondary schools for girls. Of the total number of girls in secondary schools, over one-fourth are Europeans and about the same number Indian Christians; over one-fifth are Hindus and about the same number Parsis. Muhammadans number 110 only.

95. Of 127,863 girls attending primary schools, 45,236 are in boys' schools and 82,632 in girls' schools. The girls' primary schools increased during the year from 1,110 to 1,191 and the pupils in them from 82,264 to 85,093 (including 2,461 boys). Of these, 8 are Government schools with 832 pupils, 523 local board with 26,484 pupils (against 468 with 24,824 last year), 329 municipal with 34,670 pupils, 313 aided with 21,681 pupils and 18 unaided with 1,426 pupils. The increase in local board girls' schools is due chiefly to the opening of new schools from the one lakh grant for new schools received during the year and to the adoption of the policy of separating girls from boys' schools and forming them into separate schools or classes whenever such a course appeared likely to prove successful. Of local board girls' schools 183 with 11,335 pupils are in the Northern Division, 124 with 4,709 pupils are in the Central Division, 192 with 9,192 pupils are in the Southern Division and 24 with 1,248 pupils are in Sind. Of municipal and aided girls' schools the largest number is in the Central Division as it includes Bombay—161 municipal with 15,652 pupils and 119 aided with 9,782 pupils. Of the girls in primary schools 96.5 per cent are in the lower primary standards I to IV (including Infants) and 3.5 per cent only in the upper primary standards V and VI.

96. **Expenditure.**—Expenditure on girls' schools increased during the year from Rs. 18,36,835 to Rs. 19,70,995, excluding expenditure on girls in boys' schools who form 36.1 per cent. of the total number of girls at school. The expenditure from public funds, to which Government contributed Rs. 6,04,642, amounted to Rs. 11,05,435, of which Rs. 10,04,730 was on schools for Indian girls and Rs. 1,00,705 on schools for Europeans and Anglo-Indians.

97. **Special Curricula for Girls.**—The draft curriculum for girls' primary schools has not yet emerged from the stage of experiment and discussion. It is still on trial in a few schools. So far as can be ascertained opinions about it seem to indicate that it is rather above the capacities of the present pupils. It must be admitted also that there does not appear to be any very strong spontaneous demand for a specialised primary course for girls, so long as certain girls' subjects are added to those subjects which should be common to both boys and girls. The secondary course for girls still depends largely on the requirements of Matriculation. Its future development will necessarily be governed, at any rate to a certain extent, by the syllabuses finally adopted by the new Joint Board.

98. **Grants-in-aid and Scholarships.**—Special rates of grants were sanctioned during the year for the Poona Sevasadan institutions. Special scholarships were also sanctioned in local board primary schools to induce girls to stay longer at school.

99. **Home Teaching.**—The Sevasadan home classes are increasing in popularity. Mrs. Nikambe's institution for married Hindu ladies in Bombay continued to receive the Government of India grant of Rs. 1,200 on condition that early steps were taken to reorganise it on a sound basis. As for Muhammadan women, the Inspectress of Urdu Girls' schools, Central Division, repeats her suggestion for the institution of the old Mullani system of home classes.

100. **Physical Training.**—It is gratifying to note that greater attention was paid to the subject of physical training during the year than in the past. Miss Picken of the Young Women's Christian Association, Bombay, was encouraged in July, 1917, to organise a physical training class for the benefit of teachers from schools in Bombay and the suburbs. She gave a course of about 20 lessons (2 weekly), theoretical and practical, and 46 teachers from 28 schools availed themselves of it. At the end of the course, 33 appeared at the examination and were awarded certificates. Government contributed Rs. 375 towards Miss Picken's class. Since January, 1918, the work has been taken up, from the point where Miss Picken left it, by Miss Cunliffe of the Young Women's Christian Association, Bombay. She has organised two classes: (1) "A Continuation Class" for those who have passed through Miss Picken's course and (2) "A Beginners' Class" for new teachers. The former class meets twice a week and the latter only once. 65 teachers are under training in these classes and Miss Cunliffe reports very favourably on the progress made. Government is contributing Rs. 1,740 towards these classes.

101. **Inspection.**—The Inspecting Staff for girls' schools was strengthened during the year by the creation of a new post of Inspectress of Kanarese Girls' Schools in the Southern Division. Thus there are now Inspectresses for Gujarati, Kanarese and Sindhi girls' schools, the Marathi girls' schools alone remaining without such provision. There appears, however, no reason why the latter schools should be the only ones not thus specially provided for: secondary schools apart, the number of Marathi girls' schools is quite sufficient to justify the appointment of another Inspectress. While proposing the creation of the post of Inspectress for Kanarese Girls' Schools early in 1915, the late Mr. Sharp mentioned that the Marathi girls might be dealt with in connection with the rearrangement of the Marathi districts and the proposed new Inspectorate for Bombay. The charges of Inspectresses appear hitherto to have been arranged on rather a linguistic than a territorial basis. But it is for consideration whether the latter would not be preferable to the former for administrative purposes and whether the goal to be kept in view should not be the provision of at least 1 inspectress to each division. The opening of special Anglo-Vernacular schools for girls in suitable places in the Presidency in the near future in accordance with the Honourable Mr. Kamat's resolution accepted at the last meeting of the Legislative Council will further strengthen the case for additional Inspectresses.

CHAPTER XII.

EDUCATION OF EUROPEANS.

102. **Figures of Schools and Pupils.**—The number of European schools decreased during the year under report from 47 to 45 owing to the closure of the B. B. & C. I. Railway school at Parel and the transfer of the M. & S. M. Railway school at Castle Rock to the list of English-teaching schools; while the number of English-teaching schools increased from 38 to 42 owing to the transfer above mentioned and an addition of 3 new schools to the list.

103. The number of pupils in both the classes of schools increased remarkably during the year—in European schools from 4,492 to 4,724 and in English-teaching schools from 8,090 to 8,778. The increase is reported to be due partly to the difficulty of sending children to England to be educated and partly to the influx of large numbers of boys and girls from Baghdad and Basra and is shared to the extent of 34 per cent by Europeans whose number increased from 3,923 to 4,108 in European and from 936 to 1,071 in English-teaching schools. There were besides 163 European and Anglo-Indian pupils in schools for Indians and in private institutions as against 189 last year. There was thus a total increase of 294 in the number of Europeans and Anglo-Indians under instruction in all classes of schools.

104. **Classification of Schools.**—Of European and English-teaching schools, 21 and 23 respectively are for boys and 24 and 19 respectively for girls. The European schools include 3 Normal Classes and 3 "Professional" institutions. Of the Normal Classes, which are all for girls, that attached to the St. Mary's High School, Poona, is now called St. Mary's Training College. It prepares candidates for the Departmental Secondary Teachers' Certificate Examination, the Cambridge Higher Local Examination, and the newly devised Elementary Kindergarten Examination adapted to Indian conditions. The last-named examination was held for the first time during the year under report. A proposal for a common examination for the whole of India on the lines of the National Froebel Union Elementary Examination is under consideration. The total number of students in these training classes rose from 39 to 53 during the year. Of these, 41 were Europeans. The term "Professional institutions" designates 2 classes held by the Young Women's Christian Association and Young Men's Christian Association and the Nasik school for nurses: the 3 now comprise some 57 pupils in all.

105. **Hostels.**—Of the European and English-teaching schools 34 (26 of the former class and 8 of the latter), against 28 last year, have hostels or boarding houses attached to them, 13 for boys and 21 for girls. The average charge per head for tuition, board and lodging is about Rs. 40 per mensem.

106. **Expenditure.**—The following table shows the total expenditure, direct and indirect, on European and English-teaching schools for the year 1917-18 as compared with that for 1916-17:—

		1916-17.	1917-18.
		Rs.	Rs.
European schools	Direct ...	6,21,733	6,75,056
	Indirect ...	4,94,680	3,59,765
	Total ...	11,16,413	10,34,821
English-teaching	Direct ...	4,17,712	4,56,154
	Indirect ...	87,452	1,66,482
	Total ...	5,05,164	6,22,636

The total expenditure on European schools shows a decrease which is chiefly due to the fact that no new buildings for this class of schools were

erected during the year under report. The increase, on the other hand, in the expenditure on English-teaching schools, is due to the addition of four schools and to the erection of two new school buildings for which building grants amounting to Rs. 48,430 were paid during the year. The annual tuition fee per pupil averages Rs. 47 in European schools and Rs. 30 in English-teaching schools against Rs. 23 in Anglo-Vernacular schools for Indians. The actual expenditure during the year from the recurring allotments of Rs. 40,000 and Rs. 45,000 for European schools and of Rs. 6,000 for English-teaching schools made from Imperial sources came to Rs. 39,880, Rs. 41,549-11-2 and Rs. 6,000 respectively. There was no expenditure from the non-recurring Imperial grants towards buildings or furniture and equipment. The allotment of Rs. 2,000 for medical inspection from the grant of Rs. 45,000 remained unspent because the general scheme of medical inspection of school children was held up on account of the war. The Inspector considers it desirable that the scheme for medical inspection (with aid from Government) should be given effect to as early as possible, at any rate in boarding schools. A resolution for making medical inspection compulsory in all boarding houses attached to schools receiving aid from Government was moved in the local Legislative Council by the Hon'ble Mr. N. Hogg and accepted by Government with certain reservations and the question of giving effect to it is under the consideration of Government.

107. Examinations.—The total number of candidates for Departmental Examinations increased considerably during the year. The Cambridge Local Examinations could not be held in 1917 for candidates from European and English-teaching schools: irregularity in steamer communication due to war conditions prevented the arrival of the question papers at the proper time. The discontinuance in India of the Cambridge Examinations and the improvement of the status of the Departmental Examinations have been under discussion but no conclusion has yet been reached. Schools also present pupils at the Matriculation and School Final Examinations. In March, 1917, 157 appeared and 81 passed in the Matriculation and 20 appeared and 7 passed in the School Final. Of the Matriculation candidates 24 appeared and 13 passed from European schools, while the School Final candidates were all from English-teaching schools. These results compare rather unfavourably with those recorded for the year 1916 in which 93 out of 140 candidates passed at the Matriculation and 13 out of 20 at the School Final.

108. Physical Training.—The boys have Drill, Cadet Corps training and games. For girls the "Girl Guides" organization is meeting a very distinct want, especially in Bombay where 5 companies have been enrolled with 149 members. Female teachers have also benefited by the physical training classes held by Miss Picken and Miss Cunliffe.

109. Nature Study.—Miss Burnett-Hurst of the Colaba Day School, who is an expert in Nature Study, gave a series of lectures on this subject last monsoon in Bombay; and about 40 teachers from English-teaching schools in Bombay, Thana and Bandra took advantage of this opportunity. The course was of great practical value and included two "nature rambles."

110. Domestic Subjects for Girls.—The introduction of 'home craft' in the curriculum for girls in secondary schools is under consideration. But till such time as a Domestic Science Instructress can be provided, it will not be feasible to introduce the subject in its entirety. A small beginning was made by the Inspectress of Girls' Schools, Bombay and Northern Division, by the organization of a series of 20 lessons on 'Drafting' and 'Dress-making' given by Mrs. Brown who has been trained in England and holds a certificate of the National Union of Teachers for Advanced Stage of Dress-making. The lessons were attended by 10 teachers. At the end of the course those who were found on examination to have benefited by the instruction were awarded certificates. The course having proved a success, a second course has been allowed to be similarly organized. Miss Corkery reports that the course has proved so popular that 4 schools have already engaged Mrs. Brown to lecture and demonstrate to their senior classes, while other schools are desirous of securing her services when she has time available for them.

111. Teachers and Training.—The total number of teachers in European and English-teaching schools was 819 (excluding 23 serving in special

schools) as against 764 last year. Of these, 325 are trained (against 286 last year)—179 in European and 146 in English-teaching schools. During the year 24 teachers appeared for the Secondary Teacher's Certificate Examination, of whom 15 were successful. The average pay of teachers in European and English-teaching schools was Rs. 79.5 in secondary schools and Rs. 81.7 in special schools. During the year under report, 3 teachers left schools for war duty in various capacities. The Inspector states that the total number of pupils and ex-pupils who have served in the forces in one way or another is not far short of 500 and that of these 100 have gained commissions. The dearth of good male teachers which is keenly felt in many schools may be largely attributed to the war, as young and well-educated men have no difficulty in securing work of some kind in one or other of the numerous military units.

CHAPTER XIII.

EDUCATION OF MUHAMMADANS.

112. The subject of Muhammadan education has received much attention during the past year. While the penultimate year was occupied with a detailed consideration of the recommendations of the Muhammadan Education Committee for the Presidency proper, the year under report opened with an announcement of Government decision on the various points involved in these recommendations, especially on the language question, whereby Urdu lost the position it had held since 1913 as the medium of instruction in primary schools for Muhammadans and the local vernacular was reinstalled in its place. It appeared, however, as soon as the decision was published, that it did not satisfy a considerable section of the Muhammadan community. A number of influential representations were received from various quarters asking for its reconsideration. In response to these representations a conference of leaders of Muhammadan opinion was convened and the orders issued were reconsidered. A compromise acceptable to all the parties was reached and as a result of it Government have rescinded their previous decision and have ordered instead the introduction of a system of local option. "Under this system the Muhammadan community throughout the Presidency proper will be given the opportunity to state whether they desire their boys to be taught in primary schools through the medium of Urdu or the local vernacular When the total number of Muhammadan boys in any school-going area is insufficient to justify the opening of more than one Muhammadan primary school, the medium through which instruction will be imparted at that school will be the medium preferred by the majority of parents In those schools in which Urdu is made the medium of instruction the local vernacular shall be included in the curriculum as a compulsory second language and, conversely, Urdu shall be made a compulsory second language when the local vernacular is established as the medium of instruction." These orders have pacified Muhammadan feeling which was much ruffled by the previous decision and have closed a long-pending controversy to the satisfaction of all concerned.

113. The report of the corresponding Committee appointed to investigate the question of the education of Muhammadans in Sind also received consideration during the year. Most of the recommendations made by the Committee were accepted by Government and a sum of Rs. one lakh was specially allotted to enable effect to be given to them. This allotment has been utilized *inter alia* in (a) introducing a definite and co-ordinated scheme of scholarships for selected Muhammadan boys from the lowest standard of the middle school course to the completion of the fourth year at an arts college; (b) doubling grants to Mulla schools; (c) appointing additional inspecting staff for Mulla schools; and (d) giving additional maintenance grants to important madressahs. Building grants amounting nearly to half a lakh were also awarded to two of these madressahs. It is hoped that these measures will accelerate the educational advance of the Sind Muhammadans.

114. **Progress.**—The number of Muhammadans under instruction rose during the year from 149,672 to 151,095—from 125,048 to 126,014 in public and from 24,624 to 25,081 in private institutions. Their proportion to the total number of pupils of all creeds at school was 19·3 per cent and approached very nearly their proportion (20·5 per cent) to the whole population. Of the pupils, 119,611 were boys forming 5·5 per cent of the male Muhammadan population and 31,584 girls forming 1·7 per cent of the female population. The boys show an increase of 786 and the girls of 637.

115. Of the Muhammadans attending public institutions, 119,699 were in primary schools, 5,199 in secondary schools, 138 in arts and 60 in professional colleges, and 918 in special institutions, as against 118,951, 4,992, 157, 58 and 890 respectively reported last year.

116. Of the students in colleges, 16 passed at the B.A., 2 at the B.Com., 1 at the B.E. (Civil) and 5 at the LL.B. examination. At the Matriculation examination 104 passed against 72 last year; at the School Final 25 against 28; and at the Vernacular Final 408 against 480.

117. Fee-exemptions and Scholarships.—Since the close of the year, the proportion of free-studentships available for Muhammadans in Government secondary schools has been definitely fixed at 1/3rd of the total percentage of 15. The system of scholarships for Muhammadan pupils in secondary schools in Sind has also been re-organized. Under this re-organization, 49 scholarships will be available for promising Muhammadan boys of slender means for the whole of the seven years of the secondary school course: they will be of the value of Rs. 10 per mensem in the first three years of the middle school course and of Rs. 12-8 in the next four years of the high school course. Twelve additional scholarships of the value of Rs. 30 per mensem and tenable for 4 years of the arts course have also been instituted to enable promising youths who have completed the secondary school course to proceed to the University.

118. Special Institutions for Muhammadans.—The numbers of Urdu schools and classes and of the pupils attending them in the three divisions of the Presidency proper were as follows:—

Division.	No. of Urdu schools and classes.			No. of pupils.		
	For boys.	For girls.	Total.	Boys.	Girls.	Total.
Northern	117	34	151	9,098	2,483	11,586
Central	274	97	371	16,891	8,394	44,985
Southern	203	89	292	11,620	4,374	16,994
Total	660	169	829	37,409	15,106	52,515

119. The Central Urdu Girls' Schools, Poona, had an attendance of 116 (against 101 last year) including 8 boarders and 7 non-resident stipendiaries. Five students completed the school course, of whom 3 have obtained employment as school mistresses. The question of further development of this school is under consideration. The hostel accommodation at the Central Urdu Boys' school at Nasirabad in East Khandesh stands in need of further extension. It has been recommended that the present accommodation should be enlarged and the number of admissions to the hostel raised from 14 to 30. The school presented and passed 9 students at the Vernacular Final Examination in Urdu. The Deputy Inspector of Urdu Schools, Central Division, recommends that similar Central Urdu schools be established at Poona and at Malegaon in the Nasik district. The Central Urdu Boys' School at Tankaria in the Broach district presented 11 students at the Vernacular Final Examination and passed 10; and 3 of its students who had passed in the preceding year got admission into the P. R. Training College at Ahmedabad. The First-year Urdu Training class at Ahmedabad had 29 students on its rolls on 31st March 1918, of whom 27 passed at the last certificate examination. The scope of this class is to be shortly extended by the addition of a 2nd year class to it. A two-year Urdu Training class is also to be shortly opened in Poona.

120. Mulla Schools.—I visited a number of Mulla schools in Sind in the last cold weather and was pleased to note the progress made. In 1915-16, there were 54 Mulla schools in the Hyderabad district with 1,358 pupils. In 1916-17 when the district came under the Special Mulla Deputy Inspector the number of schools rose to 68 with 1,702 pupils and in 1917-18 it went up to 97 with 2,595 pupils—the total increase in schools being 80 per cent and in pupils 91 per cent.

CHAPTER XIV.

EDUCATION OF BACKWARD CLASSES.

121. **Aboriginals.**—The numbers of aboriginal and hill tribe children attending all classes of schools in the different divisions are as follows:—

Year.	Northern Division.	Central Division.	Southern Division.	Sind.	Total.
1916-17	14,679	4,723	1,486	18	20,906
1917-18	13,712	3,982	1,643	235	19,572

The decrease in pupils in the Northern and Central Divisions is attributed to plague as well as to the rise in the cost of living which induces parents to withdraw their children from school and employ them in remunerative pursuits. Of the numbers in the Northern, Central and Southern Divisions, 13,698, 3,964 and 1,639 respectively are in primary schools; 9, 6 and 1 respectively in secondary schools; 5 and 8 in the Northern and Central Divisions respectively in technical and industrial schools; 3 in reformatory schools and 1 in a training college in the Central Division; and 3 in special schools in the Southern Division. The central boarding schools and hostels provided for the education of these classes in the Northern, Central and Southern Divisions are all working satisfactorily; and another school on similar lines has been started since the close of the year for Waghris of the Kaira district. It is proposed to draft boys of the Central Bhil School, Dohad, for some hours each week to the adjoining Government Agricultural Demonstration Farm for a little practical instruction in agriculture.

122. **Depressed Classes.**—The numbers of schools and classes specially maintained for these classes and of the pupils under instruction in these and in other ordinary schools are shown below:—

Division.	Schools and classes maintained for depressed classes.	Pupils in			Total.
		Schools and classes specially maintained for depressed classes.	Other public institutions.	Private institutions.	
Northern	78	2,752	3,263	533	6,548
Central	37	7,968	8,137	208	16,308
Southern	121	3,044	1,712	112	4,908
Sind	6	222	472		694
Total	602	14,021	13,584	853	28,459
In European schools			32		32
			13,616		28,490

The total number of institutions maintained for these classes last year was 576 and the total number of depressed class pupils in them and in other public and private institutions was 30,568. The increase in the number of schools is contributed to by all the divisions while the decrease in pupils occurred in the Northern, Central and Southern Divisions. The decrease in pupils is attributed to the same causes as have been assigned for the decrease in the pupils of aboriginal and hill tribes in the preceding section. Of the 28,490 pupils shown in the above table, 1 is in an arts college, 280 are in secondary and 27,222 in primary schools, 11 are in training and 123 in other special institutions, and 853 in private institutions. In the Southern Division, 1 depressed class student passed the First Year examination of the Training College and 1 the Second Year examination. In 3 low caste schools in the Bijapur district the teaching of carpentry has been introduced as an experimental measure.

123. **Criminal Tribes.**—Mr. Starte, I. C. S., the Special Officer for the Settlement of Criminal Tribes, opened 2 more schools during the year, bringing the total number of special schools for these tribes in the Southern and Central

Divisions to 11. Of these, 4 are in the Dharwar district, 4 in Bijapur, 2 in Belgaum and 1 in Sholapur. The attendance in the Sholapur school which has been placed under the management of the American Mission increased during the year from 610 to 679; while that in the Dharwar, Bijapur and Belgaum schools increased from 738 to 860. The total number of pupils of these tribes thus increased from 1,348 to 1,539 (this includes 547 girls). There were besides 199 children of these tribes in ordinary schools in the Central and 6,125 (all Bhamtas) in the Northern Division. These figures are included in those for aborigines given at the beginning of the chapter. With a view to providing suitable manual training for criminal tribe boys educated in his Settlements Mr. Starte has started masonry and carpentry classes as an experimental measure.

124. Marathas.—The Marathas of the Central and Southern Divisions are showing signs of awakening in regard to the education of their community. The Maratha Shikshana Prasarak Mandali of Poona, the Deshastha Maratha Samaj and the Mirya Maratha Fund Association of Bombay, and the Maratha Shikshana Samaj of Belgaum are making strenuous efforts to provide educational facilities to Maratha children. Mr. Nalk, Advocate, Poona, headed a deputation of Marathas received by me last year and represented the various difficulties besetting the education of his community. A boarding house was recently established at Palusdeo in the Indapur taluka of the Poona district with a view to attracting Maratha boys studying in village schools to a central place for higher vernacular study. It has 10 inmates at present. A larger boarding house for Maratha boys is at Nasik. It has 65 boarders, about 50 of whom attend secondary schools and the rest primary schools. In the Southern Division, 163 Marathas appeared at the last Vernacular Final examination, of whom 41 passed. 8 boys are attending the 1st year, 5 the 2nd year and 1 the 3rd year class of the Training College for Men; and 2 girls are in the first two years of the Training College for Women. 8 boys appeared at the last 'High School' and 7 at the 'Middle School' scholarship examination, of whom 3 and 1 respectively passed and won the scholarships. 54 boys are studying in the high school classes and 35 in the middle school classes. The Marathas of the Thana district in the Northern Division do not appear to be well disposed towards education. In Sind, a Marathi-speaking element is fairly conspicuous in the population of Karachi town, and its members are keen on education for their children.

125. Sikhs.—There are in all 535 Sikhs under instruction in this Presidency. Most of them, however, as may be expected, are to be found in Sind where they number 527: 18 boys and 2 girls in secondary schools and 425 boys and 82 girls in primary schools. In the Central Division there are only 4 Sikhs, 3 in secondary and 1 in a special school. 4 are in European schools.

CHAPTER XV.

EDUCATION OF DEFECTIVES.

126. The number of schools for the education of the Blind remained unaltered, while that of those for Deaf-mutes increased from 4 to 5 owing to the opening of a school for such children at Surat. The number on the rolls of the former rose from 84 to 89, while that in the latter declined from 86 to 84. The expenditure of all these schools in 1917-18 amounted to Rs. 28,643, of which Rs. 5,628 was met from provincial grants and Rs. 7,160 from municipal grants. These figures do not include statistics for the new school for Deaf-mutes at Surat as they have not been reported.

127. The Committee appointed by Government for the investigation of the problem of the education of Defectives has completed its deliberations, but its report is still in the press and has not yet been submitted. The preparation of the report was delayed by the untimely death of Mr. Fraser, Chairman of the Committee.

CHAPTER XVI.

REFORMATORY SCHOOLS.

128. The report of the Reformatory School, Yeravda, Poona, for the calendar year 1917 shows that there were 31 new admissions in the school during that year and 41 discharges. The number in the school at the end of the year 1917 was therefore 100 against 110 in 1916. At the end of the official year 1917-18, however, the number on the rolls of the school was 111 against 91 in the previous year. The number of admissions in the David Sassoon Reformatory Institution, Bombay, during the year 1917-18 equalled the number of discharges. Hence, the number in that school at the end of 1917-18 was the same as at the end of 1916-17, viz., 187. The boys at the Yeravda school prepared 100 ammunition boxes and 500 poles for army flag signalling in addition to their usual industrial occupations. The Sassoon school took an active part in the Exhibition of Indian Industries held in Bombay last year. It had two stalls—one showing various articles manufactured by the boys and the other showing some 24 boys actually at cane work. The judges "highly commended" the first and well patronized the second. The After-care Fund now amounts to close on Rs. 60,000; of which it is proposed to vest Rs. 55,000 in the Treasurer of Charitable Endowments; the Auxiliary Home for the homeless and friendless among the boys discharged is now an established fact.

CHAPTER XVII.

PRIVATE INSTITUTIONS.

129. The number of private institutions decreased during the year from 1,876 to 1,725 and that of pupils attending them from 41,119 to 40,370.

130. **Classification of Institutions and Pupils.**—Of 1,725 private institutions, 128 are advanced and 1,597 elementary. The following table shows their classification and comparative position in 1916-17 and 1917-18:—

	1916-17.		1917-18.	
	Institutions.	Pupils.	Institutions.	Pupils.
<i>Advanced.</i>				
Teaching Arabic or Persian	110	1,702	105	1,877
" Sanskrit	19	694	20	930
" some other oriental language	4	144	3	128
Total ...	133	2,540	128	2,935
<i>Elementary.</i>				
Koran schools	1,030	19,980	891	17,044
Vernacular schools	880	12,854	805	10,939
Other schools	133	5,745	201	9,452
Total ...	1,743	38,579	1,597	37,435
Grand Total ...	1,876	41,119	1,725	40,370

The percentage of pupils in private institutions to the total of pupils under instruction in institutions, both public and private, is 5·2 as against 5·3 in 1916-17. 62·1 per cent. of the pupils are Muhammadans, 33·2 per cent. are Hindus, 3·3 per cent. are Indian Christians and 1·4 per cent. others. Again, of the total number 30,582 are boys and 9,788 girls.

131. **Maktabas, Mulla Schools and Pathshalas.**—The following statement gives the information about Maktabas, Mulla schools and Pathshalas required by the Government of India:—

Maktabas (in Sind and Aden).

N.B.—Information about expenditure on private institutions in the Central Division, Northern Division and Sind is not available.

CHAPTER XVIII.

TEXT-BOOKS, LIBRARIES, PUBLICATIONS, &c.

132. **Text-Book Committees.**—114 Marathi, 63 Gujarati, 21 Kanarese and 19 Sindhi publications were received during the year for consideration by the Divisional Vernacular Text-Book Committees; and 87, 113,* 28* and 19 respectively were reported on by the preliminary reviewers. The Deputy Inspector of Urdu Schools, Central Division, was able to dispose of almost all the Urdu publications (numbering about 85) lying on his hands. Over and above the review of these publications the reporting officers had to prepare press copies for new editions of the Departmental Vernacular Readers as follows:—7 Marathi, 10 Gujarati, 6 Kanarese and 2 Sindhi.

133. **Supply of Books.**—The existing contracts for the publication and sale of the Departmental text-books in Marathi, Gujarati and Kanarese having terminated in December, 1917, fresh arrangements have been made with the approval of Government for their continuous supply.

134. **Libraries.**—The Educational Library in charge of the Inspectors of the Poona Training Class was transferred back to the Poona High School owing to the removal of the Training Class to Ahmednagar. The total number of registered public libraries increased during the year from 289 to 297.

135. **Encouragement of Authorship.**—The expenditure from the fund for the encouragement of authors amounted to Rs. 3,964-9-0.

136. **Visual Instruction.**—Arrangements for the cataloguing and classification of all the Departmental magic lantern slides, including those purchased from the late Mr. W. H. Sharp's private estate, were made during the year. The classified catalogue prepared has been sent to the press and will, when issued, serve as a useful guide to the Departmental officers in selecting and indenting for suitable slides for their lectures.

J. G. COVERNTON,

Director of Public Instruction.

Office of the Director of Public Instruction,

Poona, 12th September, 1918.

* Including arrears of previous years.

* The percentages required for 2 (a), 2 (b), 2 (c) are calculated from the figures given in columns 27, 28 and 29, respectively, of General Table IV.

† The annual cost is calculated on the direct expenditure only. The average cost of educating each pupil is obtained by dividing the direct expenditure by the average number on the rolls monthly during the year.

‡ The average cost of each pupil in Local Fund and Municipal Schools is to be obtained from the figures given in General Table VII.

§ Fractions of a rupee should be omitted, except in the columns showing the average annual cost of educating each pupil.

* The percentages required for 2 (a), 2 (b), 2 (c) are calculated from the figures given in columns 27, 28 and 29, respectively, of General Table IV.

† The annual cost is calculated on the direct expenditure only. The average cost of educating each pupil is obtained by dividing the direct expenditure by the average number on the rolls monthly during the year.

‡ The average cost of each pupil in Local Fund and Municipal Schools is to be obtained from the figures given in General Table VII.

§ Fractions of a rupee should be omitted, except in the columns showing the average annual cost of educating each pupil.

Note.—Column 11 will contain the total of all leprosed classes, whether Hindu, Muhammadan, Ahiatic, etc. The preceding columns and the total in column 10 will give the numbers of those belonging to the creeds or races specified; therefore these will be equal to the total in column 10 and 11. The grand total of columns 10 and 11, as shown in column 12 together will accordingly equal the grand total of pupils shown in General Tables I and II.

GENERAL TABLE VI.

*The percentages required for 2 (a), 2 (b), 2 (c), are calculated from the figures given in columns 27, 28 and 29, respectively, of General Table IV.

†The annual cost is calculated on the direct expenditure only. The average cost of educating each pupil is obtained by dividing the direct expenditure by the average number on the rolls monthly during the year.

‡The average cost of each pupil in Local Fund and Municipal Schools is to be obtained from the figures given in General Table VII.

§Fractions of a rupee should be omitted, except in the columns showing the average annual cost of educating each pupil.

*The percentages required for 2 (a), 2 (b), 2 (c), are calculated from the figures given in columns 27, 28 and 29, respectively, of General Table IV.

†The annual cost is calculated on the direct expenditure only. The average cost of educating each pupil is obtained by dividing the direct expenditure by the average number on the rolls monthly during the year.

‡The average cost of each pupil in Local Fund and Municipal Schools is to be obtained from the figures given in General Table VII.

§Fractions of a rupee should be omitted, except in the columns showing the average annual cost of educating each pupil.

GOVERNMENT OF BOMBAY.

EDUCATIONAL DEPARTMENT.

Resolution no. 98.

Bombay Castle, 11th January 1919.

Letter from the Director of Public Instruction, no. 8630, dated the 19th October 1918.

RESOLUTION OF GOVERNMENT.

General Results.—During the year under review there was a very substantial increase of nearly 300 in the number of public and private educational institutions in the Presidency of Bombay, the figure at the close of the year standing at 13,543, which is, however, less by 39 than that of 1915-16. The increase in the attendance was less pronounced and the number of pupils attending these institutions fell very considerably short of the numbers during the two previous years. This result was due to the presence in a very virulent form of plague, which claimed many victims among the children and teachers in the Gujarat districts. Financially, the development of education on the definite lines of progress already laid down by Government was still crippled by the necessity for the observance of the strictest economy in all branches of the administration in the fourth year of the war, but some of the restrictions previously placed upon educational expenditure were relaxed and it was found possible to increase the total expenditure by 8½ lakhs of rupees. An annual Imperial grant of 2½ lakhs was received and chiefly devoted to the purpose of raising the pay of teachers both trained and untrained. The total provincial expenditure amounted to Rs. 79 lakhs, of which Rs. 36½ lakhs were spent on primary schools, while expenditure from municipal and local funds showed a slight increase.

2. *Collegiate Education.*—Perhaps the most interesting event of the year in the sphere of university education was the final establishment of a Joint Board for the control of a single school leaving examination in place of the existing matriculation and school final examinations, which was described in the Government Resolution issued last year upon the report of the Director of Public Instruction for the quinquennium ending 1916-17. The Governor in Council is confident that this scheme will not only provide a solution of some of the most difficult problems of secondary education that have recently arisen but will also unite together the University and the Educational Department by a bond of co-operation and common service. Another interesting event was the creation of a Bombay University Company of the Indian Defence Force, which reached a total strength of 257. The chief feature of the college year was the opening by Sir Mahadev Chabhal, late member in charge of the Educational portfolio in the Government of Bombay, of the Karnatak College at Dharwar, which supplies a long felt want in the Karnatak and which has already shown the promise of a bright and successful future. In spite of the fact that there was a slight falling off in the number of college students, owing to the plague in Gujarat, there is strong evidence that the demand for higher education is in excess of the available accommodation and Government have recently appointed a committee to inquire into the whole question of providing additional facilities for education in the Government Arts Colleges by means of increasing accommodation in existing Colleges and opening new colleges in suitable areas. The development of the tutorial system which has now been introduced in some form or other into nearly every college is a matter to which the Governor in Council attaches very great importance. He does not regard this system, which forms so fundamental a part of university education in the older English universities, as an insidious method of forcing backward students through their schools but as a means for establishing a personal relationship between student and teacher and infusing the true scholastic spirit into the dry bones of the lecture hall.

3. *Secondary Education.*—Progress in secondary education was steadily maintained throughout the year, which, however, presented no marked features. The most pressing need is a greatly increased supply of trained teachers without whom it is impossible to expect the highest degree of efficiency to be reached. This question, which has for some time been engaging the attention of Government, has been retarded by the untimely death of Mr. Nelson Fraser, but the Governor in Council hopes to be able in the near future to give effect to a scheme for a substantial increase in the output of trained teachers. The Governor in Council is pleased to observe the favourable reports on the discipline of pupils in those schools in which the "scout" and other similar systems have been introduced. The extension of the scout system into fresh schools is now under the consideration of Government. Satisfactory also on the whole are the results reported from the system of hostels, which are now attached to most Government high schools, but it is a matter of regret that in certain parts of the presidency full advantage is not yet taken of the facilities that are offered. While recognising that hostel life imposes a heavier financial burden upon the parents and guardians of boys than does residence at home, the Governor in Council is of opinion that the advantages of discipline, comradeship and broadmindedness that are fostered by the hostel system should outweigh mere financial considerations and induce parents and guardians to make the necessary sacrifice.

4. *Physical Training.*—Less progress than had been hoped was made in the very important subject of physical training. A scheme had been prepared for the appointment of a half-time Director of physical training but owing to the participation in the war of America, from where it had been proposed to obtain the Director, it was found necessary to postpone its introduction. Now that the war is virtually over and a partial demobilisation may be expected at an early date, there should be little difficulty in obtaining a suitable man either from England or America. The improvement of the physique of school children is a matter to which Government attach very considerable importance and with this object in view they have prepared a scheme for the medical inspection of all pupils in secondary schools. This scheme also has been temporarily postponed on account of the war, but it is gratifying to note that several leading schools of the Central Division have already anticipated Government action in the matter and taken steps to arrange for a medical inspection on their own behalf.

5. *Primary Education.*—During the year under review it was found possible to renew the annual provincial provision of Rs. 2 lakhs for the expansion of primary education, which had been suspended for three years in consequence of the war, with the result that there was a net increase of over 300 in the number of primary schools for boys. There are, however, still many fairly densely populated areas where no facilities for primary education exist. To remedy this deficiency Government propose to take steps to open primary schools first in every village of over one thousand inhabitants and subsequently in every village containing more than five hundred inhabitants. Partial relief was given during the year to vernacular school teachers by raising the minimum pay of untrained teachers from Rs. 9 to Rs. 10 and that of untrained headmasters from Rs. 11 to Rs. 12. Since the close of the year, however, a further progress has been made in the direction of giving these low paid Government servants a living wage and their minimum pay has been increased, respectively, to Rs. 12 and Rs. 15 at a total cost of over Rs. 4½ lakhs. While Government are fully alive to the necessity of recognising the claims of these teachers to receive a wage on which they can support themselves in comparative comfort, they are strongly averse from employing untrained men when they can obtain trained men. It is the intention therefore of Government to establish a training school in every district of the presidency and Sind with the object of gradually replacing every untrained teacher by a man who has undergone at least one year's instruction at one of these schools. During the current year four of these new schools are being opened. Probably the most notable event in the course of the year 1917-18 was the passing of the Honourable Mr. Patel's bill for the introduction of free and compulsory education into municipal areas, a measure which has won universal approval and is being imitated in other provincial administrations. Several of the more progressive

municipalities have already expressed their intention of availing themselves of the provisions of the Act and of their willingness to levy additional taxation for the purpose. Rules under the Act have now been framed by Government and it is anticipated that full advantage will be taken in the ensuing year of the decision of Government to contribute one-half of the extra cost involved by the application of the provisions of the Act to many of the more important municipal areas.

6. *Technical and Professional Education.*—There was very little progress made during the year in the sphere of technical and industrial education. With the exception of the Victoria Jubilee Technical Institute no private institution has made very much headway in this direction. The work of the Committee of Direction was still hampered by the lack of a permanent inspection staff, whose appointment has not been possible hitherto on account of the war. The number of students in the Government Law School, however, continued to grow and it was found necessary to limit the number of students in each class, to increase the number of classes and to raise the number of professors from 6 to 10. The Sydehham College of Commerce and Economics again attracted a larger number of students than could be accommodated and steps had to be taken to limit the number of admissions to 70 and to require candidates to undergo an entrance examination.

7. *Female Education.*—The Governor in Council has gratification in recording a substantial increase in the number both of girls' schools and of pupils attending them with a corresponding increase of expenditure. The question of offering greater facilities for the secondary education of girls has recently been occupying the attention of Government and it is hoped that in the ensuing year it will be found possible to provide more accommodation either in the form of separate schools or in the shape of special classes attached to existing high schools for boys. A feature of the year under review was the development of physical training among girls with the valuable assistance of the Young Women's Christian Association. No less than 65 teachers are now undergoing a course of physical training in special classes and it is satisfactory to note that favourable progress is reported. This is an ancillary branch of female education to which very great importance is attached by Government and with the object of still further encouraging it they propose to appoint Mrs. Mead, wife of Mr. P. J. Mead, C.I.E., I.C.S., Director of Industries, in an honorary capacity as organiser of a department of physical training for girls in this presidency. The Governor in Council has read with interest the Director of Public Instruction's remarks on the question of the inspecting staff of girls' schools, which has been strengthened in the course of the year. In his opinion there is much to be said in favour of a distribution of inspection on a territorial rather than, as at present, on a linguistic basis. The Director of Public Instruction should therefore be asked to submit proposals for a reorganisation of the female inspecting staff accordingly. The Governor in Council takes this opportunity of paying a tribute to the notable work carried on by the Seva Sadan Society and Mrs. Nikambe's institution in advancing the cause of women's education in the presidency of Bombay.

8. *Mahomedan Education.*—Progress continued to be made in the development of education among Mahomedans and it is a matter of gratification to find that the ratio of Mahomedans to other students at the various educational institutions is now little less than the ratio of Mahomedan to other residents in the presidency. Undoubtedly the most interesting event of the year from the popular point of view was the decision arrived at by Government on the much debated question of the medium of instruction in Urdu schools, the salient features of which were described in the resolution of Government on the last quinquennial review of the Director of Public Instruction. The decision now reached is to give the Mahomedan community in every area the option of having their children taught through the medium of Urdu or the local vernacular, with the local vernacular or Urdu, as the case may be, as a compulsory second language. This decision has been warmly welcomed by the Mahomedan community throughout the presidency and it is believed that it will provide a permanent solution of the vexed question of the medium of instruction. Another important event was the impulse given to the de-

velopment of Mahomedan education in the province of Sind by the recurring allotment by Government of one lakh of rupees towards carrying into effect some of the recommendations made by the special committee appointed to consider this question. The grant will be chiefly devoted to a comprehensive scheme for giving scholarships to deserving boys from the date of their admission into the lowest standard of the middle school to the date on which they complete their fourth year of study at an Arts College and to the strengthening of the Mulla schools, the important part played by which in the education of Mahomedan boys in Sind is demonstrated by the fact that they have increased in number by 80 per cent. and in attendance by over 90 per cent. within the last two years.

9. *Administration.*—In conclusion the Governor in Council desires to record his appreciation of the very efficient manner in which the officers of the Educational service have carried on the administration of this most important department throughout the year in spite of a very serious depletion of staff on account of death, retirement and employment on military service. The heaviest loss sustained by the department was in the death of Mr. Nelson Fraser, to whose untiring zeal and devotion to duty the success of the Secondary Training College was due. The premature retirement of Mr. P. C. Wren, whose health has been ruined on active service in the war, and the retirement of Mr. Cecil Burns on the completion of his service have also been serious losses to the department at a time when so many experienced officers were employed on military duty. The thanks of Government are therefore in no small measure due not only to the Honourable Mr. Covernton, whose first year of administration as Director of Public Instruction has been marked by substantial progress in the direction of the extension of primary education and the improvement in the pay and prospects of the subordinate teaching staff, and to those officers of the Indian Educational Service who had in many cases additional duties to perform owing to the loss of their colleagues, but also to the Provincial Educational Service for the loyal co-operation of its members in the efficient administration of the department and the satisfactory manner in which it supplied recruits to fill the gaps created in the sister service.

G. A. THOMAS,

Secretary to Government.
